THE INVESTOR'S MANUAL *is now sold separately, price 9d stamped, 8d unstamped. If taken as a* SUPPLEMENT *to the* ECONOMIST, *it remains at its former price, 6d. In addition to the information formerly given, it gives a concise summary of the Reports of the Companies for the present year as will enable Investors to judge of their position.*

On January 1st will be Published the December Number of the INVESTOR'S MONTHLY MANUAL, *in continuation of the corresponding Numbers in 1866, 1867, and 1868, giving in addition to the usual information, the Highest and Lowest Prices of all Stocks and Shares for the last Three Years, the Latest Quotations for 1868, a Complete Directory, the Markets where each Security is chiefly dealt in, a Financial History of the Year, besides Memoranda relating to the Financial Position of Foreign and Colonial Governments, to Railways, &c., &c. A copious Index will be added for purposes of reference.*

The issue of this important Double Number has been fixed for this date in order that it may contain the Latest Information of the Year.

Price, with THE ECONOMIST, *1s 8d and 1s 9d; separately, 1s 4d.*

MR LOWE'S TAXES.

THERE is much discussion as to "Mr Lowe's taxes," as people are apt to call them, and the matter being a little puzzling it is no wonder that there is some confusion in many minds about it.

The first question is—What will Mr Lowe charge us in January? We give below the clauses of the Act under which they will be levied, and their effect is shortly this:—We shall have to pay in January a whole year's income-tax, that is the tax for the entire year beginning 1st April, 1869, and ending 31st March, 1870. But this does not extend to the fund-holder and the Government servant. Their income tax is therefore to be deducted just as before.

Secondly. A year's land tax and inhabited house duty—being in like manner the taxes for the year 1869-70.

Thirdly. Licenses in lieu of assessed taxes for all articles we mean to keep between 1st January and the 31st December, 1870.

This is the whole Bill now coming in to us, and when we are estimating what we have to pay we should carefully avoid thinking of anything else.

But there is also another question, which is this—How much will Mr Lowe get in this year of the different kinds of taxes?—or, what is the same question, how much shall the taxpayers pay him this year on account of the various sorts of taxes?

First. As to the income tax. We shall of course pay him, as we have just said, the whole year's income tax for the year beginning the 1st of last April and ending the 31st of next March; and we shall also pay him all the prior arrears of income tax. Under the old quarterly system of collection, there was always a quarter and often a half-year's income-tax due at the end of each financial year. Thus last 31st March Mr Lowe estimated that there was due 1,800,000*l.* We pay him therefore the whole income tax of this financial year, and whatever we had not yet paid him of the income tax of last year.

Secondly. The land tax and the inhabited house duty are different. They are levied half-yearly on the 10th of April and the 10th of October, but properly speaking the tax payable on the 10th of April is that belonging to the previous financial year. We shall, therefore, this year pay a year and a half's land tax and inhabited house duty—the whole duty for this financial year in January next, and in last April a half-year overdue from 1868-9.

Thirdly. As to the assessed taxes. We pay, as before stated, for all taxable articles we mean to keep or use in the year 1870; but besides this, we pay for all the articles we had at previous periods. This happens because the old mode of ascertaining the assessed taxes was on all articles used in the previous financial year; you were required in one year to state the greatest number of articles you had in the previous year, and upon that statement you paid. But you did not pay it very soon. As no one could know what articles he had kept in any financial year till that year was over, the assessment was not made till April—and did not become payable till afterwards. The second half (say) of the taxes for the year 1867-8 was not payable till April 10, 1869, and similarly the second half for 1869-70 will not be payable till April 10, 1870. We shall therefore pay two whole years assessed taxes this year, viz.—one-half for 1867-8; one-half for 1868-9, both on the old system; and the whole on the new system for 1870.

Mr Lowe says that he has let us off nine months assessed taxes; and that is true in this sense, that a man who begun to use a taxable article—say to keep a horse on 10th April, 1869, and gave it up on 31st December, 1869, would never pay for that horse at all. It would drop through in the gap between the two modes of collection,—it would not be included in the new mode of collection because it was not kept in 1870, and it would not be included in the old because it was not kept between the 5th April, 1868, and 6th April, 1869. But this does not make us the less pay two years' assessed taxes this year. We should not have paid on the old system for a horse bought on the 10th April, 1869, till after the 6th April, 1870. Mr Lowe's gift is of no use this year because the taxable article which he abandons would not have been chargeable this year. A steady user of the same articles will therefore pay for them this year twice—once for the use in the year 1870, and once for the use at a previous time.

As we have before explained at great length, this mode of collection is a great improvement on the old one. The mode of collecting the assessed taxes was absurd, for many people could not well remember precisely what articles they had used, and the less you remembered the less you paid. The collection of the income tax was tardy and slovenly, and there was no reason for such gratuitous delay. But we do not think it wise to collect *both* the assessed taxes and the income tax in January. The bill is too heavy, and to collect so many of your taxes at once is to violate Adam Smith's cardinal rule, that taxes "should be levied in the mode most "convenient to the subject to pay them." Two collections would be much better; and if the aggregate of these taxes should ever again become as great as it heretofore sometimes has been, two collections would be absolutely needful.

---

8. The provisions made by any of the several Acts relating to the land tax or the duties on inhabited houses for the collection and payment of the land tax or the said duties in quarterly payments or instalments are hereby repealed; and the provisions made by any Act relating to the duties of income tax for the collection and payment in quarterly instalments of the said last-mentioned duties, except such as are payable by way of deduction, or are assessable in respect of railways, are also hereby repealed: And the land tax assessed in England for the year from the 25th of March, 1869, and ending on the 25th of March, 1870, and the duties on inhabited houses assessed in England for the year commencing on the 6th of April, 1869, and ending on the 5th of April, 1870, and the duties of income tax, except such as are payable by way of deduction or are assessable as aforesaid, assessed in England or Ireland for the year commencing and ending as last mentioned, shall be payable on or before the 1st of January, 1870; and the land tax, and the duties on inhabited houses, and the duties of income tax (except as aforesaid), in every assessment in England for every year subsequent to the 25th of March, 1870, or the 5th of April, 1870, as the case may be, and the said duties of income tax (except as aforesaid) in assessment in Ireland for every year subsequent to the 5th of April, 1870, shall be payable on or before the 1st of January in each year.

16. The duties of assessed taxes now payable in Great Britain shall cease to be assessed in respect of male servants, carriages, horses, mares, geldings, mules, hair powder, and armorial bearings or ensigns employed, kept, used, or worn respectively after the 5th of April, 1869, in England, and after the 24th of May, 1869, in Scotland, and on persons using or exercising the trade and business of horse dealers after such days respectively; but all enactments as to the said duties shall remain in full force and effect as to all assessments of the said duties or any of them made or which ought to be made in England for the year commencing on the 6th of April, 1869, and in Scotland for the year commencing on the 25th of May, 1869, in respect of male servants, carriages, horses, mares, geldings, mules, hair powder, and armorial bearings or ensigns employed, kept, used, or worn respectively after the 5th of April, 1868, in England, or after the 24th of May, 1868 in Scotland, and on persons using or exercising the trade and business of horse dealers after such last-mentioned days respectively, and as to any arrears of or penalties incurred in relation to the said duties, or any of them, for any year.

17. On the 1st of January, 1870, the following duties of excise shall cease to be payable, viz.:—

The duties upon licences to be taken out by persons who shall let horses for hire in Great Britain;

The duties upon licences to let to hire horses for the purpose of travelling post by the mile or from stage to stage in Ireland;

The duties upon licences to keep, use, and let to hire hackney carriages within the limits of the metropolitan police district and the city of London, and also the weekly duties payable in respect of such hackney carriages;

The duties upon licences to keep, use, and employ stage carriages in Great Britain, and also the mileage duty payable in respect of such stage carriages;

but all enactments as to the said duties respectively shall remain in full force and effect as to any of the said duties which shall be owing or in arrear on the said day, and as to any offences which shall have been committed against any of the said enactments previous thereto.

18. On and after the 1st of January, 1870, there shall be granted, charged, levied, and paid, for the use of Her Majesty, her heirs and successors, in and throughout Great Britain, under and subject to the provisions and regulations in this Act contained, the following duties, that is to say:—

	£	s	d
For every male servant		15	0
For every carriage—			
If such carriage shall have four or more wheels, and shall be of the weight of four hundredweight or upwards	2	2	0
If such carriage shall have less than four wheels, or, having four or more wheels, shall be of a less weight than four hundredweight		15	0
For every horse or mule		10	6
For armorial bearings—			
If such armorial bearings shall be so painted, marked, or affixed on or to any carriage	2	2	0
If such armorial bearings shall not be so painted, marked, or affixed, but shall be otherwise worn or used	1	1	0
For every horse dealer	12	10	0

And such duties respectively shall be paid annually upon licences to be taken out under the provisions of this Act by the person who shall employ the servant, or shall keep the carriage, or horse, or mule, or shall wear or use the armorial bearings, or shall exercise or carry on the trade of a horse dealer.

And such duties and licences shall be excise duties and licences, and shall be under the management of the Commissioners of Inland Revenue; and, subject to the provisions of this Act, all the powers, clauses, regulations, and directions contained in any Act relating to excise duties or licences, or to penalties under excise Acts, and now or hereafter in force, shall respectively be of full force and effect with respect to the duties and the licences under this Act and the penalties hereby imposed, so far as the same are applicable and consistent with the provisions of this Act, as fully and effectually as if the same had been herein specially enacted with reference to the said last-mentioned duties, licences, and penalties respectively; and the said licences shall be in such form and shall be granted by such officer as the said Commissioners shall direct, and shall be dated on the day of granting the same, and shall expire on the 31st of December then next following.

THE LAST OF OVEREND, GURNEY, AND CO.

So much has been written on Overend, Gurney, and Co.; every argument has been so often stated; all that is needful has been so clearly explained in the admirable judgment of the Lord Chief Justice, that we shall not now weary our readers by writing at any length. Long before the jury returned their verdict the public mind had decided. According to the rough notions of mankind, even if the directors had been guilty, the penalty they had suffered would have been already quite enough. Compared with what men educated as they were must have now suffered, scarcely any felon suffers anything. The public, at least the greater part of it, would have been quite willing to let off the defendants even if they were technically guilty, on the ground that the punishment already inflicted was sufficient. But of course the law could form no such mitigated judgment; and it was necessary to inquire as strictly as in any common case whether the defendants were guilty or not.

The judgment of Sir Alexander Cockburn explains that though the Gurneys, and those accused with them, were liable "civilly," yet they were not liable "criminally," and this has seemed to some a matter of mere words, and has to very many not conveyed much meaning. But the distinction thus drawn is very important. Common sense tells us that if a man has done harm by carelessness or negligence, or any sort of fault, he ought at least to make compensation to those to whom he has done such harm. Even if he is not much guilty he is bound to do so, or else innocent persons will suffer, while he who is guilty is not suffering. But common sense and common law go on to say that when the guilt is great, when the act has been one of fixed intention and a foreseeing mind, mere compensation is not sufficient. It is not enough to put the parties injured in *statu quo*. Such acts are a public evil, and must be prevented; on them we impose a penalty, and we call them criminal acts, that is, acts in themselves deserving of punishment. The essence of a criminal act is a steady determination to produce the result forbidden.

But can it be said that either the "old directors" or the

"new"—either the partners of the private firm who joined the limited company, or the gentlemen from the outside who added their names to the board—*meant* to ruin the shareholders? They certainly meant nothing of the sort. They thought they had an excellent business to sell, and they sold it. It is true that the business had been much mismanaged; that it had for some years ceased to be profitable; that errors had been committed so very flagrant that it would almost seem as if they had been committed on purpose. But bill-broking is a business of detail; though you have discounted bad bills yesterday and lost, yet if you get wiser you may discount good bills to-morrow and gain. In this case a very large sum had not been lent on bills at all, but upon things ironically called "securities," by which it was all lost. The one thing necessary was to confine the business (as before 1860 it had mostly been confined) to the discount of good bills, and to this the founders of the limited company really intended to keep it. The really saleable article was the credit of the name—the *habit* of the public to leave money with persons calling themselves "Overend, Gurney, and Co.," —and the result showed that their credit was still good, this habit still unbroken, and that it brought in millions of money.

The most striking novelty of the recent evidence is the proof that it was a mistake of the "Gurneys" to found the limited company. Mr Harding, the liquidator, says outright that if they had continued to be a private firm they might have been in existence now. No doubt they might have failed in a panic, as the Chief Justice suggested; no doubt, as we observed last week, they would have had a high interest to pay for much money which they had laid out so badly that it brought no interest. Still they were rich men, and could have steadily put aside a large income to meet the interest; and as for panics, they might well have spared a house still so much trusted. At all events, the event which ruined the Gurneys would not have happened if they had remained a private firm and not changed to a limited company. As it was, the Gurneys had to pay the limited company 4,000,000*l*; in order to pay it they sold their estates; and as soon as the Gurneys were known to be penniless, the charm of the name was gone, and Overend, Gurney, and Co., Limited, were ruined. But as a private firm they might have lingered for years with a "latent deficit," a bad back shop; probably they would have long so lingered; and the fact that the Gurneys were under no instant necessity to sell, and that in truth they sold to their own destruction, is good evidence that they sold *bonâ fide*.

Still more is it certain that the new directors bought *bonâ fide*. They had everything to lose by bad faith, and nothing to gain by it. They were all men of high position and excellent character; they all had much to lose, and some of them were men of very large means. They were buying a business which had once been very sound and profitable, which ought always to have been profitable, and which as men of business they thought they could make profitable again; and therefore their buying it was not only excusable but defensible. How it came that they did not foresee the fatal event, which with the help of experience we see was sure to happen and was sure to ruin them, we own we cannot say. It seems now very plain that the Gurneys would have to pay very much and to sell very much, and that the publicity of the sale must cause ruin. But in the sanguine mood of forming the company probably it was hoped that after all the Gurneys need not sell so *very* much, and the name of "Gurney" was such a magic name that the new directors were fascinated with it, and liked to be associated with it. Everybody can see the folly of this now; but in 1865 half Lombard street would have been tempted and fascinated too; so inherited is credit, and so much are men of business the creatures of habit.

This being the state of the case drily put, and separated from irrelevant facts which might mislead or distract us, it is plain, on the part of either the new directors or the old, that there was no formed design to ruin the incoming shareholders; that on the contrary there was an intention to gain good profits; that so far from the affair being a "hopeless swindle," it was, as they thought, a good and a promising speculation.

It is perfectly useless to discuss whether the defendants who have been acquitted in this criminal proceeding would be liable in a civil proceeding—whether they could be compelled to make compensation though they are not liable to punishment. They cannot make compensation. The very cause of the ruin of the limited company was the reduction of the Gurney family to poverty. They have already paid all they can, and it was that very paying which caused all the misery. Probably if they had any sufficient means to compensate the shareholders, they could be made to do so. Though they had no fixed intention to injure the shareholders, yet they did injure them: they did, in fact, cause a great calamity, though they did not mean to cause it. And the way in which they caused it was by not themselves foreseeing the true effects of the facts before them, and by concealing those facts from the public, who might have judged of them better. If the world had known that there were 4,000,000*l* of excepted accounts—that the Gurney family would have to make good the deficiency in these, and in so doing the Gurney family would be ruined or nearly so,—not a share would in fact have been taken in the limited company. The mass of men would not then have been able to distinguish between the two kinds of business carried on by the old firm—between legitimate bill-broking and illegitimate—any more than they were afterwards. When the Gurneys were visibly ruined, and it was admitted that the cause of their ruin was "something" done in Overend, Gurney, and Co., the public immediately jumped to the conclusion that Overend, Gurney, and Co. was a bad concern, ran for their money in it, and ruined it. Just so if at first everybody had been told that the Gurneys had lost all their money or most of it, no one would ever have taken a share in the concern by which they lost it. The founders of the company saw that they must keep the existence of the deficit in the old firm as secret as they could, for they (or their solicitor by whose acts they must be bound) did not communicate it even to the Committee of the Stock Exchange. What they did not see is that this deficit must come out sometime, and that if it was revealed the effect must be as fatal at first as at last. If the deeds had been (as we have before suggested) printed in the *London Gazette*, and commented on in all newspapers, the public would have been warned; but the law permits secresy in such matters, and so the public must suffer. If the Gurney's could compensate the shareholders for the calamity caused by their concealment, they ought to be compellable to do so; but they cannot pay a farthing in the £ damages—all their wealth is gone already.

The affair has been most unfortunate from the beginning to the end. As if there had not been errors and blunders enough before, the prosecution was perhaps the worst and most blundering ever known. Instead of making the most of a case really capable of telling exposition, the counsel for the prosecution endeavoured to show what could not be shown, and continually incurred the judge's reproof by exaggerating what did not need to be exaggerated. So long as the prosecution of criminal offences is left in private hands, we fear it will be apt to fall to injudicious and over-zealous persons. Quiet refined people will not busy themselves in punishing others, and those who do so are nearly sure to be reckless and incautious, if not as in this case violent and ill-judging. There ought to be a State prosecutor to save us from such vulgar exhibitions on behalf of the public as those of Mr Thom and Dr Kenneally.

THE PROPOSED DISARMAMENT.

The rumour that France has proposed a concerted disarmament of all the great Powers is one of those which are circulated about once a year, and which for anything we know to the contrary may have at least as often some justification in the dreamy plans of the Emperor of the French. No doubt Louis Napoleon would be glad of any excuse for summoning a European Congress at which the influence of France might make itself safely felt, if not even predominant. But we confess that we cannot hear the revival of this rumour without the feeling that it is more or less appropriate to the season of pantomime; that there is no business in it; that if not a canard it can be meant only for purposes of political show and amusement, not to facilitate real and substantial economies. Five or six men round a table, however suspicious of each other they might be, might no doubt manage to assure themselves that they had all disarmed to the same extent, that all the firearms for example had been laid by, and that they were all on an equality as regards their weapons both of offence and defence. But when five or six great nations are in this temper of mutual jealousy and distrust, and

their respective Governments feel their heavy responsibilities for vigilant self-defence, the notion of their satisfying each other that the process of disarmament is going on *pari passu*, and with precisely proportional efficiency in each of them, is one of the most absurd of political dreams,—if, indeed, it be a dream at all, and not rather a pretext.

Consider only how complicated and how different in different nations the processes are on which the efficiency of a national armament and the reality of a national disarmament depend. It would not only be possible but easy for one nation to have far fewer men in the ranks of its army than another, and yet be far the readier of the two for war. The circumstances on which real readiness for war depends are so numerous, and often so little evident to the public eye, that any real security for the *equal* disarmament of several States must be quite nugatory. Even if each of the disarming Powers admitted avowedly resident military inspectors commissioned by the other Powers to report constantly to their own governments on the state of the preparation for war in the country in which they were resident,—even then there could be no real guarantee of reciprocity in such a matter. When one nation, like Prussia or Switzerland, depends on a Landwehr,—*i.e.*, trains its whole population to the art of war, and can at a pinch rely on a trained and disciplined levy *en masse* at least for defensive purposes, any comparison of its military strength with that of a country which, like England, depends on a mere enlisted army, or even with that of countries which, like almost all those of the Continent, depend on a conscript army, must be fallacious. It may, indeed, be fairly said that for purposes of aggression either an enlisted army or a conscript army is more effective than an army of trained citizens who live by other occupations, and who will be impatient of any call to service not visibly imperative. But then this is precisely the point of the difficulty. One country may be in a condition to fear attack, and not in a condition to avow that it fears attack. Another may only have to provide for emergencies beyond its own border. Again, an unquestionable power of triumphantly defying attack gives to the State which possesses it a very considerable advantage even in aggression with that part of its army which follows the profession of arms. Prussia, for instance, is all but impregnable against attack—much more so than France,—and Prussia has a considerable professional army, as well as its Landwehr system, to fall back upon. Would not Prussia then be likely to feel far safer in attacking France on sufficient evidence of French hostility than France would feel in the converse position in attacking Prussia? A conscript army, powerful as it is for aggressive purposes, requires plenty of time and long preparation to increase. It cannot be easily doubled or trebled on an emergency, as a Landwehr army can be. Unquestionably there can be no common measure of the two systems. The elasticity of the military system depends of course on the power which you may have of suddenly bringing large reserves into the field. In a country like Prussia the trained and disciplined reserve is the population itself; in France or Austria the trained and disciplined reserve is the whole conscript force, without relation to the number actually in service at any one time, and even this is a comparatively limited force; while in our own case, which is no doubt unique in Europe, the trained and disciplined reserve consists only of those who are actually receiving some kind of regular pay, while to obtain fresh forces of the same kind may require not only great delay but an immense increase in cost. It is plain to all the world that the talk of any guarantee for equal and concurrent disarmament of countries so differently circumstanced as these *must* be a delusion. England especially, considering the greatness of her empire and the extraordinary smallness of her standing army, might well say to countries circumstanced as Prussia, and even France and Austria are—"You must not "expect us even to *begin* our disarmament till you have totally "altered your system. So long as you can fall back at the "shortest possible notice on a perfectly disciplined host which "is now peacefully tilling the fields, and we can do nothing of "the kind, you are so much before us that we cannot afford "even to take into account how many men you may happen "to have actually under arms. You might as well compare "the strength of the position of two national banks by look-"ing merely at the amounts of their actual note-issue in cir-"culation, instead of looking at the reserves of notes and coin "on which they can fall back." It seems to us that Prussia might seem to do far more than any other great Power by way of diminishing the actual force of her "mobilised" army, and still do nothing, or all but nothing, in the way of diminishing her readiness to fight; and that France and Austria again, though in a less powerful position than Prussia, might make a great display with no real loss of strength; whereas England could hardly curtail the number of her troops at all without really sacrificing a vast deal in the way of readiness for any military emergency which might occur. Yet neither Prussia nor France and Austria would like on that account to be told—that, send as many men as they might choose to their homes, there would be no logic in requiring England on that account to disband troops, which once disbanded would be finally lost to the service. And, besides this, the co-ordinate reduction of all armaments *must* be unfair to those countries which have always been the least alarmist and the most frugal. You might as well propose a co-ordinate reduction of all their meals by rich and poor alike—by those who usually have set before them twice as much as they can eat, and those who usually have set before them rather less than will keep down positive hunger. A reduction of thirty per cent. to the former might only improve their health, while to the latter it might result in starvation.

The common sense of this matter of reduction of armaments is that it can only be effected in one way—through the individual belief of each government, acting separately, that there is little danger of any immediate strain on its military resources; and it is just as absurd to expect that the different States of Europe, having totally different emergencies to provide against as well as totally different systems of providing against those emergencies, should come to a joint resolution of this kind, as it would be to expect that different banks having totally different classes of liabilities should come to any joint resolution as to the amount of reserve fund they would keep. If mutual confidence can be encouraged, if mutual suspicions can be allayed, if dynastic changes seem less and less likely, if the question of the true "rectification of "national boundaries" becomes a forgotten controversy, if ambitious and parvenu rulers are succeeded by commonplace sovereigns who are in the hands of their people, and who reign only because their people wish it,—then we shall have a real disarmament; but it will be one which the safest and least embroiled Powers will begin first, and the most ambitious and most embroiled Powers will be the last to join in. There is no way that we see of encouraging general disarmament except by giving guarantees that war can never be capriciously entered on, can never be due to the mere political strategy of a single uneasy ruler. If the Emperor of the French wishes to secure a general disarmament, we should say that by for the most powerful means he could adopt for that end would be not negotiation but an act quite within his own power,—to descend into a mere constitutional ruler, and give up all his powers of initiating a brilliant foreign policy unsanctioned by his Parliament. That would be a real security against sudden and unanticipated wars; and it is of course the possibility of sudden and unanticipated wars, and not simply of wars of any kind, which compels the Powers of Europe to arm on so much more magnificent a scale recently than heretofore.

THE FINANCIAL IDEAS OF GENERAL GRANT AND MR BOUTWELL.

One has only to read General Grant's Message and the accompanying report of his Finance Minister to be convinced of the great disadvantages—whatever compensations there may be—of amateur Government. We have no wish to speak disrespectfully of the present American administration. On the contrary, General Grant and Mr Boutwell are both entitled to no little credit for what they have *done* in finance—for fidelity in collecting revenue, rigorous economy and retrenchment in expenditure, and other measures which in a few months have lifted their country out of the slough of discredit into which it had fallen. But it is plain nevertheless that they do not know their business as the rulers of a civilised State ought to know it. We have rarely seen more curious specimens of crude thought and prejudice in the domain of political economy than in the two documents which contain the first formal exposition of their views. With the best intentions in the world they blurt out opinions which

will keep American credit abroad from increasing as it ought, by destroying all faith in the knowledge and discernment of those who have charge of the finances. Possibly they may escape home criticism, owing to the American want of organisation for thorough political and financial discussion (though one journal at least which ought to be better known in this country—the *New York Financial Chronicle*—displays a capacity and knowledge for practical economical discussions not anywhere excelled); but the absence of home criticism furnishes all the more reason why friendly foreign opinion should be brought to bear on American views and policy. Credit abroad is confessedly a vital object of that policy, and we do the American Government a service by showing the hindrances in their way.

The *first* gross mistake which we note is the proposal of the President that the Treasury, in order to secure a gradual return to specie payments, should be authorised to "redeem "its own paper at a fixed price." This is hardly consistent, as we shall see, with other opinions expressed by Mr Boutwell, —whose own suggestion also is that of a gradual contraction of the currency,—but whoever is responsible for the opinion we can hardly express sufficiently our astonishment at it. In whatever way and at whatever cost the Americans are to return to specie payments, the inexpediency of the proposed step is extreme. It would amount in fact to a voluntary appraisement of its own discredit by the American Government The mischief of the present currency is that though nominally "money" of the United States, it has been made unequal to money by the acts of the Government issuing it or by its discredit. If the Government now buys it in at a "fixed "price" when it is bound to keep it equal to gold, it will simply be profiting by its own misconduct. That is hardly what a nation like the United States, aspiring to a first place among those who honestly pay their debts, would care to have the reputation of doing. Such an act would in truth resemble the ingenious plan lately adopted, it is said, by the Mexican Government for cancelling its debt—that of using the money in its hands not to pay the interest on its debt but to buy up at the market price the obligations which had become depreciated by the non-payment of that interest. We confess we are a little surprised at General Grant committing the blunder. One of the strongest arguments of the anti-repudiators, whose opinions he shared and enforced, always was that the proposal to pay the principal of the bonds in paper was monstrous, because it was merely giving the United States' creditor one obligation of the Government in place of another. But here General Grant proposes to treat one kind of United States' obligation as he would not treat the bonds. He does not, it is true, propose to offer other paper for them, but he offers a different thing from what is expressed in the obligation, and this was the essence of the offence in the proposal regarding the bonds. We can only suppose that the President is the victim of the fallacies which are produced by the technical terms of "paper" and "currency," and has overlooked the fact that the Government is responsible as a debtor for the full nominal value of the greenbacks.

It is no answer to say that every Government redeems its own securities at the market price. Such a representation is misleading. No solvent Government would ever have the opportunity with securities which are due and payable. The documents would be presented and paid at its Treasury for their nominal value. With regard to securities not due, or where there is only an obligation to pay the interest, a Government is in a different position. It may well buy them at the market price if below par—in any case a most doubtful advantage. But except in these cases a Government which pays off its obligations at a "fixed price" cannot escape the charge of repudiation. Mr Boutwell, as we have hinted, expresses an opinion which contradicts General Grant's idea. He points out that the discredit of the Government is one of the causes of depreciation. We hope that the matter has only to be considered to induce the present Government to repudiate as earnestly all idea of redeeming its paper except by payment in full, as the scheme of paying the bonds in paper was itself repudiated.

The *second* error we notice is connected with Mr Boutwell's own notions of how the currency is to be appreciated. Instead of grasping firmly the notion that the essence of any measure must be the provision of means by the Government, by loan or otherwise, to make its notes really payable on demand—that whatever plans to prevent shocks may be devised, the obligation on the Government is plain—he wanders into a speculation as to what the quantity of the over-issue may be, and the probable future effect on it "of the condition of the country's indus-"tries, and its financial relations to other countries." He lays it down indeed that the ability of the country to resume specie payments will be due to these circumstances, and not to special legislation upon the subject. The fallacy of this is so transparent that it is wonderful how even an uneducated financier can fall into it. The easiest way to avoid shocks in returning to specie payments *may* be to let improved credit and increased demand for currency and other natural influences have their gradual effect; but a Government like the United States, bent on making its promises as good as gold, need not wait for that result. A very slight contraction, and a very slight borrowing to effect it, would probably be sufficient to secure the convertibility of the notes. Only a part would need to be called in, and certainly not more than the Government could find means to pay. The total issue is 75,000,000*l*, and a very large part of this sum, probably the greater part, must be required for the note circulation of the States.

But the most curious part of the matter is Mr Boutwell's theory as to the conditions necessary to resumption in the way he indicates. His meaning is rather confused, but it seems to be this—that gold will be at a premium and resumption impossible, so long as American imports exceed the exports other than specie, and American bonds may be returned from abroad for payment, causing a demand for coin to be sent abroad. The latter result is to be prevented by improved credit, causing American securities to be more taken up abroad by investors; and the former by the recovery of native industries and the "consequent "accumulation of the movable products of industry to such "an extent that our exports of these products should be "equal substantially to our imports." It is the last proposition which we wish to speak of, though the absurdity of insisting so much on the possibility of American bonds coming back for conversion into cash, when the current sets so much the other way, is very flagrant. What is apparent in this talk of exports and imports is simply the mercantile theory over again. Mr Boutwell is swayed by the notion of the "balance of trade," and dreads the excess of imports for the drain of gold it produces.

The simplicity with which the error is committed is the more astonishing in an American. If we had been asked to name a country, in which by its circumstances the "balance "of trade" fallacy could not exist, we should have been apt to pitch upon America. In countries which do not produce gold there may be a subtlety to the common mind in the notion that the gold which pays for imports must be got somehow. But in America there need be no subtlety. Everyone there might be expected to see that gold is a product of the national industry just as coal is of England, and therefore as suitable an article as any other to pay for foreign imports. But Mr Boutwell is an American who does not see it, who is still swayed by the old fallacy. After this, we need hardly wonder at the persistence of any economical error. Nor is this the only reason why the balance of trade theory should be so absurd in an American. As a country with many privileged opportunities, with mines of every description, with vast quantities of virgin soil, with unrivalled if not exclusive capacities for producing some great staples such as cotton, America is necessarily attractive to capital as well as to labour. If its people are to prosper to the utmost of their opportunity, they must be borrowers abroad. In other words, a constant excess of imports into America ought to be the normal condition of things. But Mr Boutwell frets at this, and desires that the exports should equal the imports without any suspicion that this would argue a real falling off in the national prosperity.

A *third* display of ignorance is apparent in the remarks about shipping—having its origin equally in the notion about the balance of trade. We must foster shipping, says Mr Boutwell—without showing how, by the way,—because the freights we earn will help to pay for our imports. So strongly has the point taken hold of his imagination that he reasons it out in detail. A thousand barrels of flour at New York, costing six thousand dollars, if shipped by an American vessel which earned a thousand dollars for carrying them to Liverpool, would pay for seven thousand dollars' worth of goods at the latter port; whereas if shipped by a foreign vessel the six

thousand dollars would only buy six thousand dollars' worth. "This familiar example," he says, "shows the importance of "re-establishing our commercial supremacy (*sic*) on the ocean." All this is gravely put forth in an American State paper. But surely even an American must see that it cannot matter very much whether the seven thousand dollars' worth of goods are bought at Liverpool by flour plus freight or by flour alone. Flour is surely as good a thing to buy with as freight. If the necessary investment of labour and capital in earning the freight could be shown to be more profitable than the investment in internal production in America, Mr Boutwell might have a case; but he seems to fancy that the earning of the freight is a pure gain, not a diversion of American industry from other callings which may be more profitable, and he likes it for its tendency to reduce the exports. The substitution of appearance for reality in the observation of economical facts could not possibly go further. Of course we leave out of sight in this view, as Mr Boutwell however also does, the possible political importance of shipping to America; but even here we should expect from American politicians some real consideration of the question whether a commercial navy is worth much which requires fostering.

A *fourth* case of remarkable blundering is the proposal to prohibit banks from paying interest on deposits, and limit their loans upon securities to an amount not exceeding a tenth of their capital. Merchants and people in business, says Mr Boutwell, cannot get money. The money is deposited in banks, and it flows from all parts of the country to the large towns, and especially New York, where it is largely lent on call to speculators who pledge Government bonds as collateral security. This "pernicious" practice of moneyed people and the banks he proposes to put a stop to. Could anything be more absurd? What strikes us first is the absolute impracticability of the legislation proposed. Mr Boutwell has not yet got beyond the notion that a law can do anything—a cardinal error in political economy, which assigns very narrow limits to legislative interference. No one who has studied economical legislation would ever have thought of checking in that way the natural process by which banks concentrate and distribute money. It would be known beforehand that all such regulations, like usury laws prohibiting more than a certain rate of interest, would infallibly be defeated. Institutions under Government control might find it difficult to evade the law on a great scale, though they would certainly try to do so, but their inability to transact this business would only give a premium to other banks or institutions which really accomplished the same object. As to the absurdity of the reasons, it is difficult to imagine what Mr Boutwell's grievance against the private action of individuals is. Moneys, "which might otherwise be loaned for regular mercantile and other business purposes," he says, "are diverted into the custody of "banks, upon the idea that if the security is not better, payment can be secured at a moment's notice." But why should not people please themselves? Surely, whatever opinion outsiders may have as to the judiciousness of their action for the general welfare, it is no small stimulus to industry that this particular mode of employing their savings which they like shall be open to them. If the community loses in one way, it gains in another. Of course it is more than questionable whether, if individuals prefer banks to mercantile undertakings, they have not good reason for their choice; but whether this is so, and it would be a pure evil to force money into business which people avoid, it is certain that legislative restriction on the legitimate employment of money, even for a good object, would be in itself injurious. The proposed prohibition to lend money on security is especially absurd. It simply means that the man who has property is to be prevented from getting advances of money that the man who has no property may obtain them. A grosser and worse perversion of the natural rule in lending it would be impossible to conceive.

There are abundant mistakes besides, such as the suggestion to prohibit "certified checks," which are so great a facility to business, especially in a country like America, where credit is less developed than it is here. But those we have mentioned are sufficient for our purpose. Any success in finance, due to the characteristic skill of financiers, is not to be looked for in administrators who cherish such ideas. Their ignorance of the implements they handle, and the subject-matter on which they work, could hardly be exceeded. Moderate success is possible, because the opportunity is so great that it is difficult to spoil it altogether. The great resources of America, the patience of the people under taxation, might pull through triumphantly almost any financial administration which is only determined to be honest. But greater skill we fear will be necessary to obtain for Mr Boutwell all the success which he anticipates, especially any success dependent upon foreign credit abroad.

THE RECENT APPOINTMENT TO THE HEAD MASTERSHIP OF RUGBY.

THE public writers who are disputing so vehemently about the propriety of Mr Hayman's appointment to Rugby seem to us to forget one essential element in the question, and that is the value in such cases of freedom of election. It is quite certain that the selection of persons to fill appointments like principalships, head masterships, and the like, in the great public schools, must ultimately be left to some group of individuals whether they be appointed by the State, by the corporation concerned, or by each other. No system of election is possible in the usual sense of that word, for the electoral body must either be the masters of the school, in which case discipline would be sure to suffer, or the fathers of the boys, who have and can have no means of forming a collective opinion. Direct nomination as to a government office is contrary to our habits, and would involve an increase of responsibility to which the education department would object, and of power to which the classes who fill such schools are at present warmly opposed. Nothing it would be said, and we think truly said, could be so ruinous to English education as the selection of its leaders upon political grounds, and political grounds would in the long run influence the selection; no Tory Cabinet for example being likely to select such a candidate as Dr Temple. There remains only competition,—which is absurd, as no competition can decide the relative claims of different characters, and character in a Head Master is everything,—and selection by a Committee. The Committee is we conceive ultimately inevitable, as indeed is clear from the fact that Parliament after a most searching inquiry has deliberately reaffirmed the wisdom of that plan—the change introduced relating only to the mode in which the Committee should be framed.

A committee then being inevitable, the point arises whether it should be bound to select the Head Master according to certain fixed rules, or whether it should be left absolutely free to decide, as the saying is, according to its conscience, that is in fact without any external rules at all. All men of experience we believe consider the latter the wiser way. No rules could be drawn which would not admit of the appointment of some utterly unfit person, and which would not in practice help to make a "job" more instead of less easy. We might for example insist on high character, on a fixed standard of scholarship to be proved by the possession of degrees, on previous experience, and so on, and still those rules, however skilfully drawn, would admit of the appointment of a deaf man, or a harsh man, or a man so out of sympathy with his age as to be practically disqualified for the office of teacher. No rules could define that indefinable combination of qualities which constitutes administrative power, and most rules would tend to limit excessively the freedom of choice among competitors. Let any man for instance put down a series of qualifications such as he would insist on in selecting the Head Master for Rugby, and then see if under his own plan he could have appointed Dr Arnold. There was literally no excuse for that appointment, except that the trustees believed in the opinion of the Master of Balliol that Arnold was the fittest man, which opinion turned out to be correct. Character is so much in these positions, and character is so indefinable, that the only course which appears wise is to trust the Committee, and so far as possible limit them by no rules whatever; and that course has, in the case of Rugby, been most amply justified. There have been five appointments since 1828, and of the five three—those of Dr Arnold, Dr Tait, and Dr Temple—have been splendidly successful, so successful that they are pronounced good by men of every shade of opinion; one, that of Dr Goulburn, was above the average; and one only has been impugned, and that only by anticipation. Clearly the evidence is so far decisively in favour of free discretion. But then if we accept that system we must make up our minds to endure its

occasional disadvantages, and above all, to let it work. It is not allowed to work when condemnation so severe is poured upon a single appointment, but is in fact modified into a new scheme, namely, free election provided the public approve of the person elected, that is free election within an absolutely unmanageable and arbitrary rule. Mr Hayman may be all that his opponents say he is, but still he is the free choice of the Committee which has over a long period made singularly happy selections, most of them in defiance of objections which might have seemed well founded. Dr Arnold had no experience, Dr Tait was a Scotchman, Dr Temple was so young that his appointment to any other place of equal importance in the world would have been denounced as unwarrantable. Now the cry is that Mr Hayman will break up all the traditions of the school. That may be or may not be, but there is no more ground for attacking his appointment than there might have been for attacking any other, for in any case the real apology for the selection, the only and the sufficient testimonial, is that the trustees consider their nominee most fit. If they did not, then they acted dishonestly; but there is no allegation that they do not, but only that their notion of fitness includes a high standard of orthodoxy in religion and politics. Suppose the trustees should defend themselves by saying that they chose Mr Hayman because they thought the tradition of Rugby in danger of getting fossilised; that they wanted a man who would *not* be popular with the opinion which has so long penetrated the school—what answer could be made? Such an idea might on occasion be the truest of all ideas,—it was for example true when Arnold was selected,—and if the selecting committee are to act on it when it is well founded, they must be left free to act on it when it is ill founded. If discretion in fact is to be free, we must accept its results. We think it ought to be free, and therefore hold the trustees of Rugby quite justified in refusing to abandon the right which it has always been intended to concede to them, and which has repeatedly produced the best results.

SAVINGS' BANKS RETURN.

The following return shows the amounts received by, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, November 27, 1869:—

	Total Amount received by the Commissioners.			Total Amount paid by the Commissioners.		
	£	s	d	£	s	d
Savings' Banks:—						
In money and interest credited	52,706	0	8	58,408	6	1
To transfer certificates from Post Office Savings' Banks to Savings' Banks	478	2	8	...		
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...			3,725	1	5
Total	53,184	3	4	62,133	7	6
Post Office Savings' Banks:—						
In money and interest credited	160,000	0	0	...		
To transfer certificates from Savings' Banks to Post Office Savings' Banks	3,725	1	5	...		
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...			478	2	8
Total	163,725	1	5	478	2	8

	£	s	d
Total Amount on November 27, 1869, at the credit of—			
The fund for the Banks for Savings	36,862,393	17	10
The Post Office Savings' Banks fund	13,523,925	6	5
Total	50,386,319	4	3
Ditto—by last Monthly account	50,232,021	9	8

BUSINESS NOTES.

In our article last week on French finance we pointed out that the French Minister's statements in his recent report were to be taken with a correction for the special expenditure on account of the loan of last year, which was to be carried to a separate account, and which the Minister ignored altogether. On this footing, instead of there being the surpluses which the Minister talks of, there is really a deficit. But as no mention was made in any of the reports before us of the amount of the loan affected to the service of the budgets in hand, we could only make a guess as to the actual deficit by apportioning equally that part of the loan—7,600,000*l*—which we knew to be intended for all the years in question. In this way we showed that the deficit for 1868, according to the Minister's own figures, would be 1,713,000*l*, and for 1869 517,000*l*. The estimated surplus in the one case was 720,000*l*, and in the other 2,200,000*l*; and would be converted into the deficits stated by taking into account the average for each year of the extraordinary expenditure referred to—viz., 2,533,000*l*. We stated however that the actual figures for any particular year would probably be different; and it appears from the *Compte Rendu* for 1868, which we have since received, that a much larger sum than the average was really spent in that year, making the actual deficit of course proportionally higher. The average which we reckoned as expended—

	£
Was	2,533,000
The amount really applied was	5,040,000
Difference	2,507,000

—by which latter sum we must increase the figure of the deficit, which we stated at 1,713,000*l*, to get the true result for the year according to the Finance Minister's own account. In short the actual deficit of 1868 was 4,220,000*l*. The *past* is thus much worse than we assumed it to be, and the exceptional means provided against future Treasury deficits more completely exhausted.

The decision of the Master of the Rolls—in *re* Heyford Iron Works Company (Limited), Forbes and Judd's cases—is in open conflict with a recent decision of Lord Justice Giffard in Pell's case as to the effect of a subscription for shares in the memorandum of association; the Master of the Rolls in fact pronouncing the decision "quite inconsistent" with former ones. The matter in question was the same. Mr Pell had been relieved as a contributory in the Company by Lord Justice Giffard on the ground that his subscription to the memorandum of association for 1,350 shares was satisfied by the assignment to him of 1,500 fully paid-up shares, as the purchase-money of the property, of which 1,350 had been put in his own name, and the remainder had been transferred to other subscribers of the memorandum of association. Two of these gentlemen now sought to be relieved on the same ground—that the obligation in their subscription was covered by the assignment of fully paid-up shares. The Master of the Rolls, however, dissents strongly from the view of Lord Justice Giffard and dismisses the summons with costs to give an opportunity for an appeal, which he hopes the Lord Chancellor will also hear, so as to have the law clearly settled. The matter is a very interesting one, as the effect in the present case would have been, and might be in other cases, that there was really no one liable as a contributory. The only other members of the Company were stated to be two shareholders for one share each, and a subscriber of the memorandum for 20 shares, who it was said was insolvent. These were all who could be made to contribute, although on the face of the memorandum of association 30,000*l* had been subscribed. We agree with the Lord Justice that the public ought to know what they are dealing with in regard to a company of this description; but short of fraud we see no necessity for the shares subscribed for in the memorandum being always held to be exclusive of any shares assigned under an agreement for the purchase of property. The result is the same as if a company had subscribed money and the property had *then* been bought. It is a different matter if the sale is fictitious and the shares are treated as paid up to defeat the creditors; but Lord Justice Giffard expressly held that if the transaction could be impeached, the situation of the subscribers to the memorandum would be different. We shall be curious to see how the controversy between the Master of the Rolls and the Lord Justice ends; but the case we may remark incidentally shows the inconvenience and expense to litigants of a weak appellate court. The Master of the Rolls would not have disputed the verdict of a superior court, though he does not scruple to decide against one of two single judges to whom an appeal may be carried from his own judgment.

The decision of Lord Justice Giffard (*re* the National Permanent Benefit Building Society, *ex parte* Williamson and others) will not be without interest, we believe, to many building societies and their creditors. Till lately it has been doubted whether powers to borrow money in the rules of such societies were legal; but apart from such powers a practice has grown up to some extent—how far we cannot say—for directors to borrow money for the purposes of the society on their own security. The association being one for mutual lending and borrowing, the directors, when the applications

for loans exceeded the funds, borrowed from others to carry on the business of lending. The decision of the Lord Justice is a warning against the practice. It is to the effect that the directors in so doing cannot bind the society or its individual members. An application by some creditors created in this manner to wind up the defendant society in the present case on the ground of their debt was refused, because the Society was not bound. The decision is the more important, as the argument in support of the application relied on an equitable doctrine, which the Court has lately very strongly maintained. The debt it was said was contracted for the purposes of the society, and they had the benefit of the money; but the Lord Justice decided that this could not be held so in the present case. In the German Mining Company's case and others, the creditors were parties who stood in the place of those to whom the Company had come to owe money equitably; but in the present case "there was no proof that one sixpence of the borrowed money had gone to pay debts for which the Society was legally liable. On the contrary it was clear that the money was advanced in making loans to the members." The distinction we fancy is a very fine one. The members of the Society assenting to the advance of the money to members—that is, to the use of the money in their business, there is some ground for maintaining that they have got the advantage of it just as a railway company would get the benefit of an advance of materials from a contractor to make their railway. But the distinction is made, and all concerned with building societies should understand their duty to be careful.

The British Nation Assurance Association were hardly well advised in their resistance to the claim upon them this week in Atherton's case before the Master of the Rolls. An insurance company should be most reluctant to defend any claim, but especially so if a good deal of time has elapsed and the premiums have been paid by a third party who is the holder of the policy for a valuable consideration, as was the case in the present instance. The policy being for 1,000*l*, with 360*l* paid in premiums by the plaintiff, who was the son-in-law it is true of the party on whose life it had been granted, but who had become an onerous holder shortly after the policy was granted,—it was hardly wise to resist even had the case been one of most extreme misrepresentation. The defence relied on was far from strong enough to justify the policy of resistance, even if it had been legally good. It was in effect that the insured and the plaintiff had kept the Company ignorant of the intemperate habits of the insured; but it appeared that they had some notice, his statement in reply to the usual printed question of the Company being that he was "temperate generally." An answer like this ought to have put the Company on their guard, although it may not in itself have given an exact impression of what the insured's intemperance was. Not having inquired at the time, they must be held to have taken the life with all risks. To make insurance policies properly trustworthy, insurance companies should rely as much as possible on their own inquiries, and not on statements made to them.

A strong decision against settlements has been given by Vice-Chancellor James. In the case in question, Freeman *v.* Pope, the question was as to the settlement of a policy of insurance by the late Rev. John Custance in favour of the defendant—the plaintiff being a creditor subsequent to the settlement. It was held that though the settlement was effected without any fraudulent intention in 1863, and none of the creditors who were also creditors at that date sought to impugn it, yet the right of any subsequent creditor to set it aside was the same as that of the prior creditor, and it was unnecessary to show that the settler was insolvent at the time. It was enough if the settlement was an obstacle to the recovery of the claim. With the new bankruptcy provisions against settlements, throwing the onus of proving solvency on the parties taking under the settlement if the bankruptcy occurs within ten years after, and making all settlements void within two years of bankruptcy, very effectual precautions are taken for securing creditors' rights; but cases may occur when the supplementary ruling of a judgment like this will be useful.

Vice-Chancellor Malins has decided that mere registration is not sufficient to constitute a company an English one for the purpose of being wound up, although in the case before him—*re* the General Company for the Promotion of Land Credit (Limited)—the Company itself did not object to the application. The Company carrying on business substantially in Brussels, with directors resident there, it was entirely foreign, and it was difficult to see why it had been registered here. The Legislature never intended the Act to apply to such companies. Accordingly he dismissed the petition, which was only opposed by the Princess of Reuss, holder of twenty paid-up shares.

Frequent mention has been made in the Overend and Gurney trial of the enormous profits of the business; but this is a point which appears susceptible of a good deal of exaggeration. We noticed last week the force of the liquidator's remark that the limited company was formed at an unfortunate time for the business of bill-broking when the rate of interest was rising; but even in good years the profits, when strictly looked at, are not very great. The new company was started with a capital of 1,500,000*l*, and the old partners reckoned that they had a sum of 1,126,000*l* in the business, on which amounts the profits made are far from being so very great as the large sums divided would induce people to believe. In the ten years before 1860, Mr Harding states the average profit was 220,000*l*, and the average division among the partners 146,000*l* per annum, and afterwards, though nothing was divided, owing to losses, the earning power of the good business continued. But 146,000*l* on 1,126,000*l*, the capital of the old partners, is only 12½ per cent., and even the gross profit of 220,000*l* shows a dividend of no more than 19 per cent. If we compare this with one of the large joint stock banks, say the London and Westminster, we find that in the year before the limited company of Overends was formed it made the following profits:—

	£
First half-year	234,032
Second ditto	238,405
	472,447

—a profit of nearly half a million, or 36 per cent. on a capital which was then, including reserve, only 1,300,000*l*, a very little more than that of the Overends, and less than the capital with which the new company was to start. The truth is that the bill-broking business, unlike a bank, can only be carried on with a large proportionate capital. In general the broker does not discount with money which he has first procured, but first discounts, and then uses the bills to obtain money for new operations. Unless there is a capital in proportion to the business done, he would not have bills for the customers who came to him with money. On this account the business can never be so profitable as that of a banker, who needs no capital except as a guarantee, and gets money deposited with him on less onerous terms, and much of it without paying any interest. It is very doubtful whether the public expectation of large gain from the Overends' business would not have been disappointed, even if the concern had not been rotten. The excessive delicacy of the business and the great nominal amounts risked in proportion to the profits, were additional obstacles to very great gain from this mode of joint stock enterprise.

It is not an uncommon supposition that a country loses the best part of its population by emigration—that it is the weak who stay at home, and the strong who go. The contrary opinion of a careful observer who has paid special attention to the question of what constitutes the strength of race is well worth noting. Mr Galton in his recent book on "Hereditary Genius"* states—

> No nation has parted with more emigrants than England, but whether she has hitherto been on the whole a gainer or a loser by the practice I am not sure. No doubt she has lost a very large number of families of sterling worth, especially of labourers and artisans; but, as a rule, the very ablest men are strongly disinclined to emigrate; they feel that their fortune is assured at home, and unless their spirit of adventure is overwhelmingly strong, they prefer to live in the high intellectual and moral atmosphere of the more intelligent circles of English society to a self-banishment among people of altogether lower grades of mind and interests. England has certainly got rid of a great deal of refuse through means of emigration. She has found an outlet for men of adventurous and Bohemian natures, who are excellently adapted for colonising a new country, but are not wanted in old civilisations; and she has also been disembarrassed of a vast number of turbulent radicals and the like, men

* "Hereditary Genius: an Inquiry into its Laws and Consequences." By Francis Galton, F.R.S. London: Macmillan and Co. 1869.

who are decidedly able, but by no means eminent, and whose zeal, self-confidence, and irreverence far outbalance their other qualities.

We are inclined to think that this must be the true view. The people who emigrate are not the weakest part of a nation; one of the consequences of an increase of prosperity in an old country is to produce a greater ability to emigrate in some classes; but certainly the very strongest part of a community is likely to remain, for the reasons which Mr Galton states. We are inclined to think too that the rule applies at least to many classes of artisans as well as to the "very ablest men" whom Mr Galton speaks of. Special aptitudes of every sort, qualifications for the conduct of trades which also require large capital, are most encouraged in an old country, which thus draws irresistibly the greatest varieties and the highest degrees of individual excellence. At the same time it must be allowed that emigration often drafts away ability hardly distinguishable from the best that remains. It is a very small balance against a competitor which tells in the keen struggle of the old world, and even a slight run of ill-luck may have such consequences as to dispose many to emigration who would be as fit for a career as those who stay. No certain conclusion can be come to, but certainly the colonies and America have done nothing to fairly demonstrate in their inhabitants superiority of breed over that of the nations from which the common theory is that they have been taken by a process of natural selection.

The following mercantile embarrassments are reported this week:—

Mr James Hunter, of Belfast, in the grain trade. It is stated, however, on authority, that the inconvenience to this house, caused by the stoppage of Messrs James Pim and Co., is only temporary; that the estate shows a large surplus, of which the principal creditors in Belfast are satisfied, and that no interruption to the business is anticipated.

Messrs Bradley Brothers and Leedham, wholesale warehousemen, of Great Carter lane.

Mr George Gledhill, cloth merchant, of Leeds and Morley. Liabilities 5,500*l.*

Mr G. W. Russum, of Church street, Manchester, cloth agent and merchant, is stated to have called a meeting of his creditors, at which a statement of affairs will be submitted.

Messrs Hamilton, Graham, and Co., of Bradford and Manchester. Liabilities 25,000*l.*

Mr William Wilkinson, lasting manufacturer, of Halifax. Liabilities 7,000*l.*

Messrs Nicholls and Co., cloth merchants, of Leeds and Morley. Liabilities unsecured 23,000*l*, and assets 6,300*l.*

Messrs E. and W. Tinker, cotton manufacturers, of Britannia Mills, Bugsworth, Derbyshire, and Victoria Works, Mottram. Liabilities 9,000*l.*

Messrs George Barnes and Son, cotton spinners and manufacturers, Haslingden. Liabilities 4,000*l* to 5,000*l.*

A telegraphic statement that a native dry goods' dealer has failed at Valparaiso with liabilities for 30,000,000 dols, or 6,000,000*l*, is on the face of it absurd. One or two mercantile stoppages, of a minor character only, are reported.—Vice-Chancellor James has granted a winding-up order in the case of the Medical Invalid and General Life Assurance Society—the largest of the companies amalgamated with the Albert. There were two petitions—one a shareholder's and the other a creditor's—and the order was made upon the shareholder's.

MR LOWE ON THE COINAGE.

TO THE EDITOR OF THE ECONOMIST.

SIR,—The present gold production of California and other portions of the United States territory appears, from trustworthy estimates, to constitute as much as 40 per cent. of the new gold now being added to the existing stock of gold in the world. Moreover, the United States are rapidly attaining the first place amongst all gold-coining countries. We cannot, therefore, attach too much importance to the course that may ultimately be adopted by the United States in connection with international coinage and the Convention of December, 1865.

The following table will show, in the most compendious form, the relative importance, as manufacturers of gold coin, of the United States, England, and France, before and after the new gold discoveries:—

	Percentage of Each Nation's Coinage to the Total Coinage of the Three Nations.	
	Years 1792–1851.	Years 1851–68.
United States	18	33
England	49	22
France	33	45
	100	100

As the coinage of the Australian Mints (Sydney and Melbourne) is now made legal tender concurrently with the coinage of the London Mint, the preceding statistics are subject to the following modification as regards the period 1851–1868:—

	Per Cent.
United States	31
England and Australia	26
France	43
	100

It is very questionable indeed whether the English and Australian Mints jointly will be likely to equal, in production of gold coin, the amount of future issues of the United States Mints at Philadelphia, San Francisco, and Denver, when a general resumption of cash payments shall be resorted to.

In 1861, Mr Secretary Chase estimated the amount of gold and silver, in circulation and in the Treasury and banks, at 275 million dollars. In February, 1869, Mr Blake, Commissioner for California to the last Paris Exhibition, estimated the figures at 200 million dollars. If, however, the calculation be restricted to gold coin exclusively, both in and out of the American territories, it may fairly be estimated that about 250 million dollars at the utmost have remained down to the present time in their original form of double eagles, half-eagles, and gold dollars, &c., out of the total of 910 million dollars coined from 1792 to 1868. The amount requiring re-coinage, to become international coin in the sense of the Paris Convention, thus appears to be only half as great for the American current coinage as for that of the English. But, at the same time, the difference to be bridged over between the old and new coin, or, in other words, the reduction in weight to accomplish that object, is, proportionately, four times as great in America as in England. For example, the pure gold in the half-eagle or 5-dollar piece would have to be reduced from its present weight of 116·1 grains to 112·0089343 grains, the weight of pure gold in the present 25 francs of gold, the assumed international pound of the future. This would be tantamount to a diminution of 3·52374 per cent. of pure gold in the American, as compared with a required diminution of ·87846 per cent. in the English coinage.

The United States have already, on two occasions within the last thirty-five years, altered the weight of their coin, namely, as regards gold in 1834, to the extent of about 4·44 per cent., and, as regards silver in 1853, to the extent of about 6·79 per cent. There have been precedents also in recent times amongst some of the most honourable countries in Europe for a certain reduction of weight of the coinage without a tariff of compensation between old and new debts, or without any equivalent imposition of fresh or augmented seignorage. Prussia, within the lifetime of the present generation, has reduced the weight of her dollar. And when Holland, after the gold discoveries, demonetised her gold coin, abolished the double standard, and coined a new florin, it was reduced from 9·613 grams of pure metal to 9·450 grams, being an intrinsic reduction of about 1·69 per cent., or very nearly double the proportionate reduction which would make British coinage international in the countries now included in the Monetary Convention of December, 1865. But in so much larger a measure of alteration as the 3·52374 per cent. reduction that would be requisite to bring United States coinage within its scope, a tariff of adjustment with public creditors on the payment or conversion of their securities, and an authorisation to private creditors to recover upon the old standard, is an essential condition.

Considering, however, that if the Convention of December, 1865, is to extend to the whole world, identical conditions as to seignorage must be adhered to by all parties to it,—it would seem as if too little attention or study, perhaps scarcely any at all, has been given to them hitherto by the United States. Taking the seignorage of ½ per cent. at the Philadelphia Mint, and the delay in delivery of coin for bullion at about two

months, which is equal to another 1 per cent. at 6 per cent. per annum interest, it would be fair to deduct 1½ per cent. from the above difference of 3·52374 per cent. between international coinage and present American gold coinage. This would then be diminished to, as nearly as possible, 2 per cent., and the tariff might fairly be established at that amount, 100 dollars of gold debt of present currency to be treated as 102 dollars of gold debt in international currency, and *vice versâ*.

Senator Sherman visited England and France in 1867, and some of your readers who had the pleasure of meeting him on that occasion will recollect the warm interest he took in the results of the international coinage inquiries made down to that date, although the subject of seignorage had not been so maturely discussed as it has since been in Europe, whilst it has not yet even received the same attention and study in America. However, Mr Sherman, to some extent a precursor in his own country in introducing to the Legislature a plan for joining the Monetary Convention of December, 1865, such as Mr Lowe has brought before the English House of Commons in a maturer form, introduced a Bill into the United States Senate on the 6th January, 1869, and with amendments on the 9th June of the same year, to reduce the American gold coins to the weight and fineness adopted by the Monetary Convention of December, 1865. This would give 620 dollars to the kilogram of gold, nine-tenths fine, and other gold coins in proportion; the silver half-dollar to weigh 116 decigrams, and the silver pieces of 1 dollar, 5 cents, and 3 cents, to be discontinued; the gold coins to be a legal tender in all payments to any amount except for such existing funds of the United States as are payable in coin; and tariffs to be furnished by the Director of the Mint, at which the now current United States and foreign coins shall be reckoned.

Mr Sherman was much aided in the Senate by Mr Sumner, who in April of the present year has again renewed the proposition. The Canadian Parliament had already received with favour the announcement of a Bill for equalising half-eagles and 25-francs of gold; and Mr Sherman concluded the report accompanying his Bill, by explaining that he had the highest authority for saying "that Canada stands ready to "adopt the plan the moment it is adopted by the United "States. Different representatives of the South American "States say those States will readily adopt it; so that upon "Congress now rests the fate of a measure that, according to "the opinion of eminent American statesmen, will shed un-"fading glory upon the age of its adoption; that will give to "international law an international coinage, and will lead to "a vast extension of the objects of international law common "to Christian and civilised nations, thus binding the whole "family of man by the same ties that are uniting and con-"solidating neighbouring States."

These views of Senator Sherman's may appear too enthusiastic to certain minds in which phlegm altogether extinguishes sentiment, but, to others, they are nothing more than sober truths, expressed with just that tinge of enthusiasm which betokens the conviction that they are rightly held by those who take the duty of helping forward a question of cosmopolitan interest like international coinage. There can be little doubt that, but for the great political and fiscal questions which have preoccupied the Government of the United States for the past two years, America would, ere now, have arranged a treaty for entire conformity with the Paris Monetary Convention, even independently of the action England might take in it; but the time will by no means have been lost if England, Canada, and the United States can jointly confer upon it next year with the nations already included in that Convention.

In the meanwhile, in the United States, as in England, the opponents of any change have distracted attention for awhile by appearing to receive with a degree of favour certain rival schemes, and in some instances purposely promoting them. On the principle of the time-honoured tactics of "divide and govern," foster various plans of coinage reform, and you will weaken all.

Some of these rival American schemes profess, erroneously as it turns out on inquiry, to possess greater advantages in what may be termed a hyper-metrical point of view, but they are infected with the practical demerit of disturbing the existing metallic circulation of every country in the world, whilst the Monetary Convention of December, 1865, aims at disturbing it to the least practicable extent. It will be desirable briefly to consider these schemes, as there is a sort of parallelism between them and various plans suggested in England and France, so that they may usefully be studied in that aspect. This is proposed to be done in a further communication.—I am, Sir, your obedient servant,

Nov., 1869. FREDK. HENDRIKS.

PUBLIC COMPANIES.

RAILWAY COMPANIES.

Buffalo and Lake Huron.—Dividends for the five half-years ended December the 1st, due on the 7 per cent. coupon bonds, will be paid after December 30th.

Buffalo and Lake Huron.—Capital expended, 1,701,056*l*. The particulars of the new agreement with the Grand Trunk are as follows:—A rent is to be paid half-yearly to the Buffalo Company (say)—for the year ended the 1st of July, 1869, 42,500*l* (in Equipment Stock); ending the 1st of July, 1870, 45,000*l*; ending the 1st of July, 1871, 50,000*l*; ending the 1st of July, 1872, 55,000*l*; ending the 1st of July, 1873, 60,000*l*; ending the 1st of July, 1874, 63,000*l*; ending the 1st of July, 1875, 66,000*l*; ending the 1st of July, 1876, 67,000*l*; ending the 1st of July, 1877, 68,000*l*; ending the 1st of July, 1878, 69,000*l*; and for every subsequent year 70,000*l*. To the amount of 42,500*l* per annum the rent-charge was to rank next before the First Equipment Bonds of the Grand Trunk Company, and the balance would rank next after the Second Equipment Bonds, which the Grand Trunk were now authorised to raise. The ordinary shares of the Buffalo Company were to be exchanged—one-half (615,000*l*) for the like amount of Grand Trunk Fourth Preference; one-half (615,000*l*) for the like amount of Grand Trunk Ordinary Stock. Special meetings are to be called for the consideration of this agreement. The board consider it falls short of their due rights; but recommend it to avoid expensive and lengthy litigation.

Dutch-Rhenish.—A provisional dividend of 17s 9d per fully paid share, and of 5s 4d on the new shares, has been declared.

East Indian.—The Chord line is being pushed forward; and on the Jubbulpore line, the only unfinished work is the Jubbulpore station. The working expenses have been reduced from 45·60 per cent. to 38·32 per cent. Passengers carried during the half-year 2,520,944, against 2,576,910; goods carried 697,835 tons, against 584,989 tons. The gross earnings for the half-year has been 1,349,821*l*, against 1,084,634*l* in the same half last year, showing an increase of 265,187*l*; and the net earnings 832,481*l*, against 590,022*l*, showing an increase of 242,459*l*. The net earnings per train mile has been 5s 5d, against 4s 3¾d in 1868. The gross earnings for the half-year ended 30th of June last on the Jubbulpore line has been 54,307*l*, against 41,283*l* in the corresponding half-year. The working expenses exceeded the receipts by 10,560*l*. That which appears to be a loss on the Jubbulpore line represents, more or less, a corresponding profit on the main line. After providing for Sir M. Stephenson's annuity, 2,500*l*, and laying aside 10,560*l* to meet the expenditure on the Jubbulpore line, there is available for distribution 65,490*l*, from which the board recommend the payment of a dividend at the rate of 5s per cent., free of income tax. After payment of the dividend and income tax, there remains about 5,700*l* to be carried over. On the 10th of October the Hullshur and Barr district was visited by an unprecedentedly heavy flood, which did some temporary damage. Through arrang ments with the Delhi railway have been made.

Grand Trunk.—At the adjourned meeting the report was adopted. After a lengthy explanation of the company's affairs, the chairman concluded by recommending the construction of the Buffalo Bridge as soon as arrangements were completed with the Buffalo and Lake Huron. He looked forward to the completion of the Intercolonial railway.

Indian Tramway.—At the meeting the report was adopted, and it was agreed to transfer assets to the Carnatic and the Pondicherry railways—new companies.

Mexican.—The collection of the Customs' dues assigned to the company has produced 90,577*l*, and 46,390*l* since the 1st January. The Mexican Government have approved of the statistics of the company; but have appointed four directors. Traffic returns are reported to have been favourable; and the extension to Orizava is being proceeded with.

Oude and Rohilkund.—Permanent way materials for 300 miles of line have been supplied, and a further 230 miles are ordered. The revenue account of the Lucknow and Cawnpore line, 42 miles in length, for the half-year ended the 30th of June, shows that the gross earnings were 10,931*l*, and the expenditure 9,620*l*, leaving a balance of 1,311*l*. The capital account shows a total receipt of 1,591,940*l*, and a total expenditure of 472,632*l*, leaving a balance in cash and stores of 1,119,308*l*.

BANKS.

Agra—(Old Agra and Masterman's Bank Shares).—It is announced by the committee that an arrangement has been made under which the Agra Bank have agreed to take over the interest of shareholders in the surplus assets of the former bank at the rate of 4*l* 15s per share, by an immediate cash payment,

which will be open for the acceptance of shareholders resident in Europe up to and including the 31st inst.

Anglo-Austrian.—The administration have announced the payment of coupon No. 8, due the 1st January, at the rate of 8s 9d per share (being 5 per cent. per annum on 7*l* 10s for the first half-year, and 5 per cent. per annum on 10*l* for the second half-year), free of income tax.

Anglo-Hungarian.—An interim dividend of 4 florins silver, or 8s per share, is payable at the offices of the Anglo-Austrian Bank.

Delhi and London.—It has been resolved to reduce the capital from 50*l* to 25*l* per share.

London and River Plate.—At the meeting the 12½ per cent. per annum dividend was declared.

National of Scotland.—Year's net profits, 141,494*l*. At the meeting it was decided to pay a dividend of 13 per cent., while 11,494*l* was carried to "rest" (now 321,720*l*), and 8,500*l* was carried forward.

Provincial of Ireland.—The directors notify that a dividend for the half-year ending Christmas, at the rate of 4 per cent. on the paid-up stock, and also an extraordinary dividend of 30s on each 100*l* share, and 12s on each 10*l* share, will be paid on the 15th of January.

MISCELLANEOUS COMPANIES.

Argentine 6 per Cent. Loan.—The numbers of bonds representing 32,500*l* have been drawn for redemption on the 1st January.

China Submarine Telegraph.—The order for the manufacture of the cable has been given.

Contract Corporation, Limited.—The official liquidator is prepared to pay another dividend of 1s in the pound, which will give 20s in the pound, with interest, to creditors who hold the joint names of the Joint Stock Discount and the Contract Corporation.

Crystal Palace.—An ordinary dividend of 1½ per cent. is recommended, in addition to the usual preference distributions. Year's available profit, 47,356*l*; balance after dividend, 1,512*l*. The cost of "special attractions" has been heavy, but they have been profitable, especially as programmes and reserved seats covered more than half the cost. The debt on the Dulwich Wood account has been reduced to 3,247*l*. The accounts show a capital expenditure of 1,482,089*l*; gross revenue, 143,916*l*.

Dowraven United Collieries, Limited.—Creditors are required to send the particulars of their claims to the official liquidator, at Cardiff, by the 31st January, the 28th February having been appointed by the Court of Chancery for adjudicating upon them.

Guinea Wallsend Colliery, Limited.—A first dividend of 7s 6d in the pound is payable on the 8th proximo.

Northern Assam Tea.—Creditors are required to send the particulars of their claims to Mr Samuel Barrow, of Gresham street, the official liquidator. Creditors resident in Europe are allowed till the 5th February, and those resident elsewhere are allowed till the 15th of April.

Phosphate of Lime, Limited.—Creditors are required to send the particulars of their claims by the 12th of January to Mr S. L. Price, the liquidator appointed by Vice-Chancellor Malins, the 19th January having been fixed for adjudicating upon them.

Russian (Vykzounsky) Ironworks.—The debenture debt has been arranged, and the net profit has been set aside in extinguishing the amount charged for the Koulebak Works, and in adding 17,500*l* to the reserve (now 37,500*l*). It is proposed to increase this reserve to 60,000*l* to cover the estimated value of the goodwill.

Special Settling Day.—The Stock Exchange Committee have appointed Thursday, the 30th inst., a special settling day in the English scrip of the Italian Government Five per Cent. Stock of 1867 (second issue), and also in the scrip of the Bucharest and Giurgevo State Railway Bonds, both of which are to be officially quoted.

ASSURANCE COMPANIES.

Accidental and Marine Insurance Corporation, Limited.—The liquidators have requested the opinion of the creditors with reference to an offer received by them of 10s in the pound from a large body of the alleged contributories of the corporation as past members, with the view practically of terminating the pending litigation.

National Widows' Fund, Limited.—Mr George Scott, of Bond-court, Walbrook, has been appointed official liquidator by the Master of the Rolls.

Royal Exchange Assurance.—A dividend of 4 per cent. has been declared for the half-year.

MINING COMPANIES.

Great Wheal Vor.—At the quarterly meeting the accounts showed a balance in favour of the mine of 4,141*l*, out of which a dividend of 5s per share, making 1,477*l*, was declared, and a balance of 2,664*l* carried forward to the credit of next account. Since September tin ore has fallen 9*l* per ton, making a difference in this company's receipts for the three months of nearly 1,200*l*.

Van.—Dividend of 10s per share payable on the 31st inst.

Literature.

A Brief Review of Some of the Principal Arguments for and Against the Chancellor of the Exchequer's Proposal to Reduce the Quantity of Gold in the Sovereign. With Observations. By James Maclaren, Barrister-at-Law. London: Edward Bumpus. 1869.

The discussion on the sovereign is very protracted; but this short pamphlet certainly deserves a remark amid the crowd of communications which assail the public. The author has plainly thought out the subject for himself, and goes to the root of the theoretical question in his final conclusion—that though the cost of production regulates the price of gold coin as of everything else, and to charge a seignorage would add to its value in the first instance, yet the demand for coin is very variable, and intervals would be of frequent occurrence when the over-supply would cause depreciation, until the cessation of production brought things round again. On this account, he maintains, a coin on which no seignorage is charged is more useful, as the over-supply of coin is at once checked by its conversion into bullion, and the consequent depreciation prevented. We suspect this will be the practical view, and it coincides with our own. A very little risk of depreciation, it should be remembered, will be a strong argument against any change, as it cannot be said that the present system, which secures us against the risk, costs us anything to speak of in comparison.

Thoughts on Double Entry and Balance Sheets; Addressed more Particularly to Shareholders in Joint-Stock Companies. London: Edward Stanford. 1869.

This is a popular explanation of the most important technical words of book-keepers and a good introduction to the art. There is often a deal of confusion as to books in people's minds, which a popular treatise like this will help to clear up. What has to be kept in mind is the object of an account, and those who know least of them would soon understand them, or construct them for themselves, by first answering the question what facts are to be recorded. Applied to joint-stock companies' accounts, the principle should make shareholders distrust all accountants' jargon, and teach them to look for plain statements of liabilities and assets, and entries of losses or gains in the year. The author's object is praiseworthy, and his effort towards it deserves success, which we hope it will receive, though we have our fears of the difficulty of contending with the popular incapacity for accounts.

Independence of the Judges in the Straits Settlements; and Observations on Judicial Independence in the Colonies Generally. By William Napier, Esq. London: W. Dawson and Sons.

By the transfer of the Straits Settlements from the control of the Indian Government to the position of a Crown colony, an interesting question as to the independence of judges has arisen. Formerly, the judges in the Settlements, like other judges under the Indian Government, were only removable by the authorities at home, a position conferring on them the practical independence of our own judges; but by becoming judges in a Crown colony they are rendered liable to removal by the local governor. The change appears to have shocked both the judges and the European community in the settlements, and there has been a good deal of excitement on the subject, resulting in memorials to the Colonial Office, which have perhaps been somewhat hastily disregarded on the plea that the rule as to judges being dependent on governors has always been so in Crown colonies. Personally the judges concerned would have no small cause to complain, and in any case as the writer of the present pamphlet contends, instead of roughly applying the old rule to a new case, the Colonial Office should rather have been led to inquire into the rule by having brought before it the experience of Singapore under a different system. We must say we can see little reason for conferring on the Colonial governors the extreme power over judges given them by the present rule. At first sight it would seem the most expedient course to make the Colonial Governor the Chief Judge, concentrating all authority in his hands, as his rule must be despotic; but if there must be judges they should at least be independent of him—the only doubt being whether that independence might not be farther secured than it would be by subjection to the home Executive. The rapidity and facility of communication, which are daily increasing, tend to make all judges, even in the most distant colonies, liable to the action of Parliament, on some scandal occurring, as if they were at home. The whole question is most interesting, and is thoroughly treated in the present pamphlet from Indian and Colonial experience.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Thursday.

The *Moniteur* has published the following return of the Bank of France, made up to Dec. 23. The return for the previous week is added:—

DEBTOR.	Dec. 23, 1869. f	c		Dec. 16, 1869. f	c

The discounts of the Bank are a little better this week, presenting an increase of 2,606,000f, and the present deposits are 8,900,000f less. In the coin and bullion there is an augmentation of 6,972,000f, and in the circulation of notes one of 2,420,000f.

Confidence in the political situation continues to be displayed by speculators on the Bourse, and prices of most speculative securities are firm:—

In last letter it was stated that twenty-two deputies of the Corps Legislatif favourable to the maintenance of the treaties of commerce had demanded to interpellate the Government respecting them, and that a counter demand bearing fifty signatures had been presented by the Protectionist deputies. From this it must not be assumed that these latter have the majority in the Chamber; for the fact is, that the former might have had upwards of 100 signatures if they had chosen, but they deemed it sufficient to have their demand signed by the committee they have placed at their head.

The shipping interest is not touched by the treaties of commerce, but a law of 1866 exposed it, by the abolition of differential duties, to the competition of foreign flags. Accordingly, the Protectionists have made great efforts to induce this interest to join in the agitation they are making against the treaties of commerce, and they have partially succeeded. At Havre a number of the principal shipowners have signed a declaration that the said law has done shipping and the industries dependent on it grave injury, and they demand to be allowed to prove their allegation before a Committee of the Legislature. At Nantes the Chamber of Commerce, in announcing that it will send delegates to the Superior Council of Commerce charged with the "inquest" on the treaties, takes occasion to say that the Merchant Navy is suffering grievously, and to demand an inquiry respecting it. These demonstrations are certainly not without importance. But against them are to be set these facts:—1. The Chamber of Commerce of Havre, which has to deal with other interests of the town as important as shipping, complains of certain special burdens weighing on the latter (maritime inscription, vexatious regulations, &c., &c.), but does not denounce the law of 1866, and demands a liberal commercial policy with moderate protection duties. 2. At Bordeaux, the general feeling of the Chamber and the public is not hostile to that law, but the said special burdens are complained of. In that port, however, the merchant captains have in a meeting expressed fears of the foreign flag. 3. At Marseilles no unreasonable dread of foreign competition has been manifested either by the Chamber of Commerce or the shipping interest, but a remedy of the peculiar grievances of shipowners and seamen is demanded.

The Protectionists pursuing their "campaign" have during the past week got up a grand meeting of the iron trade at St Dizier. It is affirmed that representatives of iron works in not more than 31 departments were present. The meeting, after listening to fiery speeches, passed resolutions demanding the denunciation of the treaties of commerce; the abolition of navigation duties on canals and rivers; the extension of railway communications; a "return to the identical" in temporary admissions, and the suppression of the traffic "in the powers of introduction." For readers not initiated in the mysteries of French tariffs it may be necessary to explain that what the iron-people mean by the "identical" is this—iron is allowed to be imported free of duty for the manufacture of machines, &c., destined for export; but as it is almost impossible to follow the transformations it undergoes [in the making of a locomotive for example], the importer is permitted to present to the Customs a corresponding quantity in its place. In demanding, therefore, that the "identical" brought in shall, after being worked up, be sent out, the iron-masters evidently want to stop the import altogether. The "traffic in the powers of introduction" is a demand for the same thing in different words. But if the wishes of these gentry were to prevail, engine-builders and other workers-up of iron would be injured.

In addition to the demonstration of the iron-masters, the Protectionists have had a new one of the manufacturers of Mulhouse, in which M. Pouyer-Quertier figured, and they have obtained "adhesions" from the Chambers of Commerce or commercial societies of small towns. In one place an agricultural association has declared for them, but it evidently does not understand agricultural interests.

The defenders of the treaties on their part have had grand demonstrations in the departments of the two Charentes, and are preparing a very imposing one at Lyons. The Chamber of Commerce of Nice has pronounced in their favour; and the Chamber of Exports of Paris, which represents the most important interests of the capital, has published an energetic defence of the treaties. At Montpelier an association has been formed to support commercial liberty, and the Chamber of Commerce of that town has passed resolutions declaring that the treaties have been advantageous to the country, and would have been still more so if they had been courageously accepted, and if trade had not been disturbed by the clamours of the Protectionists.

The French post-office has not thought fit to accept propositions for a reduction of rates made by the United States, and accordingly the latter power denounced their treaty with France. In consequence of this denunciation the French Emperor has decreed that from 1st January next the postage of a letter of 10 grammes to the States shall be 60 centimes (nearly 6d) when sent by vessels going direct from France, and 70 centimes by way of England.

The new inquiry into the monetary system recommended some time back by the Minister of Finance is about to be undertaken by the Superior Council of Commerce. A committee has been appointed by it to draw up a series of questions to be elucidated. This committee is in favour of the issue of a gold-piece of 25f. The Minister has reinforced the Council by adding to it M. Victor Bonnet, an economist, and M. Bordet, of the Council of State, who are authorities on the monetary question.

In the Senate a few days back two petitions were presented from holders of Austrian bonds of 1865, complaining of the income tax imposed on those securitities, representing that it was a violation of a promise made when they were issued, and calling on the French Government to interfere on their behalf, for the reason that it had authorised the quotation of the bonds at the Bourse, and had thereby given them a certain sanction. But a committee which examined the petitions reported that the authorisation refused to engage in any manner the responsibility

of the Government. The President of the Senate added that there was another reason for declaring the Government irresponsible, and that was that it had by a common law no right to refuse or accord permission for quotations at the Bourse, the matter being entirely within the jurisdiction of the stockbrokers, except however in cases in which the quotation was for a State at war with France, and the Government could check it. The Senate accordingly passed to the order of the day on the petitions. But in spite of the dictum of M. Rouher, it is certain that the present Government has arrogated to itself the power of refusing or admitting the negotiation of foreign loans at the Bourse, and that statesman himself once said in the Corps Legislatif that it was unfortunate it had the power, since a refusal might give offence to a friendly State, and authorisation would appear to recommend the security, though it might be bad.

The shareholders of the Credit Mobilier have held a meeting to deliberate on the proposition of the directors for amalgamating that "institution" with the Immobilière Company. The basis proposed was the reduction of the capital of the Mobilier to 60,000,000f, one-fourth thereof to be awarded to the shareholders of the Immobilière for their shares. Two groups of shareholders opposed the project and presented new ones. None of the three schemes was approved of; but eventually the directors' plan was accepted with the modification that the Immobilière should only get 12,000,000f, instead of 15,000,000f. It now remains for the Immobilière shareholders to sanction or reject this arrangement, and the general belief is that as they thought 15,000,000f too little, they are not likely to content themselves with 12,000,000f.

Although somewhat important demands have recently been made for foreign enterprises, it is said that new ones are contemplated by certain bankers for an operation in connection with American securities, and for a personal loan to the Viceroy of Egypt. The latter has consented not to borrow any more for the Egyptian State without permission of the Sultan of Turkey; but he has not consented to abstain from raising money on his own account.

The Meridional of Italy Railways Company has obtained from the Banque de Paris, the Bank des Pays Bas, and some other establishments, an advance on security of the obligations it has not yet issued, though authorised so to do; and the banks propose to offer a portion of them to public subscription at 400f to 420f, reimbursable at 500f, and bearing 30f interest.

It was stated last week that refiners and importers of sugar complain of the "types" employed by the Customs for the classification of raw sugars. The Minister of Commerce has issued a circular on the subject to the Chambers of Commerce. This document says:—"The report has been spread in some seaports that in consequence of conferences held at the Hague, the types applicable to sugars declared in temporary admission [that in claiming exemption from duty after being refined and exported] were to be modified. In that report there is exaggeration, and it is as well to state the facts. According to the minutes of the conferences held at the Hague the types of Havana and the West Indies, which interest specially the commerce of maritime towns, have not become changed; but the same is not the case with the types of beetroot sugar. Accordingly, in conformity with the arrangement concluded at the Hague, every department is at this moment occupied in modifying the types in order to approach them as much as possible to those of Holland. As soon as this operation shall be terminated, I will transmit the result to the Chambers of Commerce, and will send them a box of samples of the model types." From an address just sent to the Minister by the Chamber of Commerce of Marseilles, in the name of a considerable number of refiners, shipowners, merchants, and brokers, it appears that they desire that new types, like those used in Holland, shall be "immediately" issued, "in order to put an end to the intolerable and trying inequality in which their industry is placed with respect to its Dutch competitors." At the same time they demand that the French Government shall "be inspired somewhat with the spirit which has always animated that of Holland"—that is to say, shall cast aside various amended calculations about Customs' duties, and promote the prosperity of colonies and shipping by developing the refining industry. The "intolerable inequality" referred to is said to consist in this fact:—"That it is proved that there is a difference of one and two numbers between the Customs' types of France and Holland, and that the sugars of Java, typed to commence Nos. 16 and 17, are in Holland daily classed Nos. 13 and 14, and consequently admitted to the yield of 88 per cent., whilst the same sugars in France are invariably classed 15 to 16, and subjected to a yield of 94 per cent." The practical working of this is, says the Chamber, that the Dutch (as already stated) are underselling the French refiners in Italy, notwithstanding they have to bear greater expenses for carrying, insurance, averages, and interest than the French.

The subscriptions to the 44,000 obligations of the Orleans to Rouen Railway (section from Orleans to Dema) are only to receive about 50 per cent. of their demands.

The coupon on the Tobacco Obligations of Italy falling due 1st January, and that of interest on shares, are to be paid by Messrs Stern and Co. The former, tax deducted, is 13f 68c, the latter 7f 50c *lire* of Italy. From the same date the obligations of series V, recently drawn, are to be paid off at 500f.

The Comptoir de l'Agriculture is from 3rd January to distribute 10f per share on account of dividend of 1869.

The Parisian Gas Company will distribute from 3rd January next 12f 50c as interest on paid-up obligations, and 7f 50c on those on which 300f are paid.

The Lyons and Mediterranean Railway Company is to pay their coupons from 1st January:—7f 50c on Geneva and Dauphine bonds; 7f 50c on the 1852 and 1855 Lyons; on the Bourbonnais; on the 1853 and 1854 Grand Central; on the 3 per Cent. Rhone and Loire; 12f 50c on Rhone and Loire 4 per Cent.; 25f and 27f on St Etienne to Lyons; 26f on St Etienne to the Loire; 25f on Marseilles to Avignon.

The coupons which the Eastern Railway Company is to pay after the 1st January are 25f on the Montereau obligations; 12f 50c on the Strasbourg to Bale; 7f 50c on the Dieuze to Avricourt; 7f 50c on the Ardenner.

The South of Austria and Upper Italy Railway Company is to pay from 3rd January 7f 50c as interest on obligations.

The Company of the Docks et Entrepots of Havre (represented at Paris by Messrs de Rothschild) is to pay 7f 50c on bonds after the 2nd January next.

The Company of the Docks et Entrepots of Marseilles is to pay from 3rd January 7f 50c as interest on obligations.

The coupon of the mortgage bonds of the Viceroy of Egypt falling due the 8th January are to be paid from that date by Messrs Pastré.

The French Transatlantic Steam Navigation Company is to pay from 3rd January 6f 25c per share on account of dividend of 1869, and 12f 50c as interest on bonds.

The Credit Mobilier is to pay from 3rd January for the Cordova to Seville Railway Company 10f per share on account of dividend of 1869, and 7f 50c interest on obligations.

The Company of the Herault Railway (local interest) is to pay from 1st January 7f 50c on obligations.

A company formed for employing in lighting and heating a new sort of gas called "gaz aerifuge," which it alleges is 50 per cent. cheaper than that ordinarily used, solicits the public to subscribe 8,000 shares at 500f.

The Madrid Gas Company, represented by the Credit Mobilier, offers shareholders the choice between paying a new call of 125f, or receiving three new shares in exchange for four old ones.

The directors of the Spanish Credit Mobilier call for the 26th February a general meeting of shareholders, to take into consideration a proposition for reducing the capital.

The market report is as follows:—

FLOUR.—At *Paris*, yesterday, eight marks, 55f the sack of 157 kilogs; superior, 54f.

COTTON.—At *Havre*, in the week ending Friday, the sales amounted to 27,003 bales. Compared with the prices of the preceding week, United States were 5f to 7f higher from very low to low, and 1f to 3f from very ordinary to ordinary. Surat, Tinnevelly, Scinde, and Madras, 2f to 3f; Coconada, 1f; Bengal, 4f to 5f. The price of New Orleans, very ordinary, was 137f the 50 kilogs; Oomrawuttee, good ordinary, 117f; Tinnevelly ditto, 112f; Madras ditto, 107f. This week calm has prevailed, and yesterday New Orleans, very ordinary, 136f and 136f 50c; low middling, 135f; Oomrawuttee, good ordinary, 117f to 118f.

COFFEE.—The sales at *Havre*, in the week ending Friday, were 1,400 sacks Hayti, 58f 50c to 68f the 50 kilogs; 200 ditto, 60f 50c; 500 ditto, 50f 50c to 61f; 500 St Marc, 62f to 68f; Rio, 52f to 58f 50c; 578 ditto washed, 72f to 72f 50c; 1,000 Santos, 57f 50c; 50 Porto Rico, 84f; 217 Mysore, 70f; 2,900 Winard, 72f; 50 Reunion, 120f, duty paid. This week Rio, 42f 50c to 59f, and washed, 72f 50c and 78f; Capitania, 52f; Guatemala, 66f 50c; Mysore, 70f to 72f; Winard, 70f and 72f; Java, 84f 50c; Ceylon, 72f; ditto Plantation, 84f to 87f; St Marc, 70f; Hayti, 52f to 70f; Gonaives, prices not stated. At *Bordeaux*, last week, 100 sacks La Guayra, 67f; 230 ditto garbled, 83f 50c and 84f; 90 Costa Rica, 104f; 217 Mysore, 100f; 60 Rio, 57f; 270 ditto washed, 84f 50c to 86f; some Guadaloupe, 147f 50c. This week, La Guayra garbled, 72f; Winard, 103f. At *Nantes*, last week, 328 bales Reunion, prices not stated. No sales this week. At *Marseilles*, last week, 530 sacks Rio, 54f and 56f; 300 Capitania, 54f 50c. This week, Rio, 56f; Capitania, 54f 50c.

SUGAR.—At *Havre*, in the week ending Friday, some French West India, 53f 25c the 50 kilogs, duty on sample; and some usine, 61f 50c. This week, usine, on sample, 48f 50c to 53f. At *Bordeaux*, last week, 12,960 sacks Mauritius, 55f 25c to 56f 50c, bonne quatrieme; some French West India usine, 58f to 62f. This week, Reunion, 54f 50c, bonne quatrieme; French West India, 50f 50c, ditto; Havana, 32f 50c, No. 12. At *Nantes*, last week, 11,290 sacks Reunion, 54f 50c, bonne quatrieme; 7,028 Mauritius, 56f 25c, ditto. This week, Reunion, 54f 50c, bonne quatrieme. At *Marseilles*, last week, 1,800 bales Mauritius, 36f 50c and 37f, No. 12; some Martinique, 32f 50c, bonne quatrieme. No sales this week.

INDIGO.—The market was calm at *Havre*, in the week ending Friday. 2 serons Guatemala and 2 chests New Granada, at established prices. This week, Bengal. At *Bordeaux*, last week, 54 chests Kurpah, at advanced prices; 10 Madras, 20 Bengal, 24 Caracca, at established quotations. This week, Bengal, Caracca, and Guatemala.

HIDES.—At *Havre*, in the week ending Friday, 874 La Plata dry, 106f the 50 kilogs for ox, and 112f 50c cow; 1,780 Monte Video salted saladeros cow, 60f; 2,800 Buenos Ayres ditto, 57f 50c to 57f 75c; 500 Pernambuco salted, 55f. By auction, 1,308 ditto dry salted, 61f 50c to 82f; 65 ditto salted, 42f; 111 Lima dry, 90f; 165 ditto dry salted, 70f to

87f 50c; 783 Martinique salted, 53f 75c to 62f 50c; 685 Hayti dry and dry salted, 56f 50c to 81f 50c. This week, Rio Janeiro salted ox, 52f 50c; Pernambuco dry salted, 81f; ditto salted, 54f 50c; Monte Video dry ox and cow, 102f 50c; ditto salted, 60f 50c; Buenos Ayres dry cow, 117f 50c; ditto salted saladeros, 57f 75c; La Plata horse dry, 9f each.

WOOL.—At *Havre*, in the week ending Friday, 600 bales La Plata unwashed, 1f 35c to 1f 70c the kilog; 40 Peru unwashed, 1f 35c to 1f 85c; 70 Russia washed, 5f to 5f 50c; 53 La Plata sheepskin unwashed, 97½c to 1f 35c. This week, Monte Video unwashed, 167f 50c and 165f the 100 kilogs; Buenos Ayres ditto, 130f to 155f, and washed, 395f; Australia unwashed and washed, prices not stated; La Plata sheepskin, 80f.

TALLOW.—At *Havre*, in the week ending Friday, sales were active. La Plata saladeros ox, 53f 25c to 53f 75c the 50 kilogs, and for delivery, 53f 50c; mataderos, 49f; sheep, 51f 25c to 51f 50c; and for delivery, 51f 62½c to 51f 75c. This week, La Plata sheep, 51f 50c and 51f 62½c; ditto mataderos, 50f. At *Paris*, yesterday, the 100 kilogs, without octroi duty, were for French, 102f 50c.

SPIRITS.—At *Paris*, yesterday, 3-6 first quality, 90 degs., 55f and 54f the hectolitre. At *Bordeaux*, the day before yesterday, 3-6 Languedoc, 86 deg., 78f; 3-6 beetroot, first quality, 90 deg., 60f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Board of Trade have received, from the Secretary of State for Foreign Affairs, a copy of a Despatch from Her Majesty's Minister at Madrid, enclosing a Decree of the Spanish Government, relating to the dues to be paid on vessels introduced into the Islands of Cuba and Puerto Rico; the careening, sale, mortgage, and manning of Spanish vessels; and the importation of materials for shipbuilding and machinery for steam vessels.

The official returns of the trade of Austria (exclusive of Dalmatia) in the first half of the year 1869 show that in that period the imports of merchandise, not including bullion and specie, were of the value of 181,587,825 fl, an increase of 10,289,938 fl over the corresponding period of 1868; and the exports of merchandise were of the value of 199,737,923 fl, a decrease of 20,410,172 fl, still leaving the exports of greater value than the imports. A material decrease in the value of the exports in 1869 is shown in corn, wool, sugar, wood, and small wares. The export of corn (of all kinds) declined from 52 million florins in the first half of 1868 to less than 30 million florins in 1869, the imports in both years being about four million florins. Small wares declined from 27,778,045 fl to 23,506,968 fl. Most of the other articles of export however shew some increase in 1869. Linen yarns reached 4,068,445 fl, and linen manufactures 8,570,806 fl, the import of linens rising to 4,744,382 fl. The export of cotton manufactures also rather increased, and amounted to 2,832,725 fl, the import also increasing to 2,660,520 fl; the import of raw cotton amounted to 19,000,000 fl. The import of silk manufactures increased to 10,597,920 fl; the export to 5,383,430 fl. The export of woollens advanced to 7,358,531 fl; the import decreased to 6,296,580 fl; the export of raw wool declined to 100,493 zoll. centner (nearly equal to our cwt), of the value of 13,064,090 fl; and the import is returned as amounting to as much as 7,736,605 centner, of the value of 5,320,115 fl. The export of sheep and goats increased, the number reaching 131,009; and the export of oxen amounted to 48,977, the import to 30,890. The export of apparel exceeded the import by 3,000,000 fl. Leather gloves of the value of 1,524,000 fl are among the exports. The import of machinery into Austria advanced to 3,786,610 fl; power-looms of the value of 326,800 fl were imported. The import of metals increased largely, and amounted to no less than 15,172,405 fl, iron rails accounting for 6,886,674 fl, and the import of metal wares reached 4,593,279 fl; on the other hand, the export of metals, rough and half-manufactured, amounted to 1,738,936 fl, and the export of metal wares shows a great increase, the value amounting to 6,346,108 fl. Paper is an article of export of the value this year of 2,421,948 fl, and paper wares 1,333,866 fl; the import of paper was only to the extent of 432,165 fl, and paper-hangings 267,750 fl. Books and maps are in the imports for 3,743,730 fl, and in the exports for 2,086,590 fl, both amounts showing an increase. The export of corn spirit advanced to 268,291 centner of the value of 4,024,365 fl, of butter to 1,288,950 fl, and of lard to 2,543,046 fl. Coffee and its substitutes form a large item of import, amounting in the half-year to 8,301,492 fl. The export of glass increased, plain glass advancing to 4,090,734 fl, and silvered 3,857,040 fl. Corn constituted 15 per cent. in value of the exports, and small wares nearly 12 per cent. Textile manufactures appear for about 24,000,000 fl, both in the imports and exports; the import of silks exceeding the export, and the export of other textile manufactures exceeding the import.

The following condensed statement of the United States Revenue and Expenditure is taken from Mr Boutwell's annual report to Congress:—

RECEIPTS.

	Fiscal Years Ending June 30, 1869. Official Returns. Dols. c.	Fiscal Years Ending June 30, 1870. Partly Estimated. Dols. c.	Fiscal Years Ending June 30, 1871. Wholly Estimated. Dols.
Customs	180,048,426 63	187,598,921 86	185,000,000
Inland revenue	158,356,460 86	174,926,352 51	175,000,000
Land sales	4,020,344 34	4,893,864 8	5,000,000
Miscellaneous	28,518,515 38	27,412,483 57	28,000,000
Total	370,943,747 21	394,831,622 2	393,000,000
EXPENDITURES.			
Civil list	58,474,061 53	55,102,202 5	60,000,000
Pensions and Indians	35,519,544 84	34,647,242 79	36,000,000
Army	78,501,990 61	54,095,468 5	50,000,000
Navy	20,900,757 97	19,782,630 98	18,000,000
Debt interest	130,994,242 80	131,202,270 74	127,000,000
Total	321,490,597 75	294,730,514 59	291,000,000
Surplus	49,453,149 46	100,101,107 43	102,000,000

Of the tax collected on spirits in the United States in 1869, $30,543,998 were collected from spirits at the rate of 50 cents per gallon, against $13,419,092 in 1868 at $2 per gallon. Of the tax on tobacco there were collected $13,638,934 on chewing, $3,206,544 on smoking tobacco, and $4,957,679 on cigars. There were collected from retail liquor dealers $1,676,690. Of the taxes on gross receipts, railroads paid $3,255,487; insurance companies, $1,323,330; express companies, $579,567; steamboats, $222,964; telegraph companies, $205,441; theatres, operas, &c., $231,052; stage coaches, $183,128; ferries, $144,978; bridges, $51,257; lotteries, $60,329; ships, barges, &c., $36,967; canals, $649,456. On special taxes, retail dealers paid $1,885,099; wholesale dealers, sales not over $50,000, paid $1,405,994; wholesale dealers, sales over $50,000, $4,081,696; stock-brokers paid, $75,507; produce-brokers paid, $86,954; claim agents, $36,986; lawyers, $337,818; lottery ticket dealers, $58,240; hotels, $587,162; manufacturers, $1,222,675; physicians and surgeons, $489,410; stallions and jacks, $325,602; peddlers of fish, $12,397. Of the income tax, there was derived from personal income $25,025,068, from bank dividends $3,769,185, from railroad companies (dividends) $2,831,140, from railroad companies (interest on bonds) $1,503,846, insurance companies (dividends) $847,668, from salaries of United States' officers $561,962. On articles in Schedule A there were derived from billiard tables $22,605, from carriages $184,035, from silver plate $204,537, from watches $471,286.

An account, pursuant to the Act 8 and 9 Vict., cap. 38, of the amount of bank notes authorised by law to be issued by the several banks of issue in Scotland, and the average amount of bank notes in circulation, and of coin held, during the four weeks ending Saturday, the 4th day of December, 1869:—

Name and Title.	Authorised Circulation.	Average Circulation.	Average Amount of Coin held.
	£	£	£
Bank of Scotland	343418	645705	387722
Royal Bank of Scotland	216451	654318	523557
British Linen Company	438024	554449	188142
Commercial Bank of Scotland	374880	732710	425770
National Bank of Scotland	297024	541371	309227
Union Bank of Scotland	454346	663818	315241
Aberdeen Town & County Banking Company	70133	186142	136274

Caledonian Banking Company	53434	97234	57051

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the second week of December, 1869, and of the corresponding week in 1868:—

	Paupers. Indoor. Adults and Children	Outdoor. Adults.	Outdoor. Children under 16	Total. 2nd week Dec., 1869.	Corresp'nding Total in 1868.
West district	5,897	9,331	7,640	22,868	19,963
North district	6,371	12,105	9,039	27,515	27,648
Central district	7,046	8,228	6,794	22,068	21,663
East district	8,149	11,955	11,487	31,591	31,876
South district	9,227	18,649	18,484	46,360	42,856
Total of the Metropolis	36,690	60,268	53,444	150,402	143,004

The West district includes Kensington, Fulham, Paddington, Chelsea, St George (Hanover square), St Margaret and St John, and Westminster.

The North district includes St Marylebone, Hampstead, St Pancras, Islington, and Hackney.——No return has been received this week from Hackney.

The Central district includes St Giles and St George (Bloomsbury), Strand, Holborn, and City of London.

The East district includes Shoreditch, Bethnal green, Whitechapel, St George-in-the-East, Stepney, Mile-end old town, and Poplar.

The South district includes St Saviour's (Southwark), St Olave's (Southwark), Lambeth, Wandsworth and Clapham, Camberwell, Greenwich, Woolwich, and Lewisham.——No return has been received this week from St Olave.

TOTAL PAUPERISM OF METROPOLIS.—Population in 1861, 2,802,000.

	Number of Paupers. Indoor.	Outdoor.	Total.
Second week of December, 1869	36,690	113,712	150,402
— — 1868	36,641	106,363	143,004
— — 1867	36,539	110,651	147,190
— — 1866	33,444	89,483	122,927

A table showing the actual and proportional increase in the number of paupers in such of the metropolitan parishes and unions as were reported to have had an increase in the fourth week of November, 1869, over the corresponding week of 1868:—

No.	Name.	Actual Increase.	Proportional Increase. Pr. Cnt.
1	Fulham	666	39·15
2	Lewisham	422	30·7
3	Woolwich	798	15·95
4	Kensington	508	18·8
5	Camberwell	693	18·5
6	Bethnal green	761	17·9
7	Paddington	291	13·7
8	Wandsworth	552	13·6
9	Islington	501	10·3
10	Hampstead	38	9·6
11	St Giles	200	9·1
12	St Olave	289	6·9
13	City of London	436	5·7
14	Mile End Old Town	165	5·7
15	St George, Hanover square	135	5·6
16	St Margaret, Westminster	248	5·1
17	Shoreditch	249	4·9
18	St Saviour	375	4·0
19	St George-in-the-East	134	3·4
20	Holborn	224	2·7
21	Chelsea	18	·7
	Aggregate in 21 Unions	7,713	
	Decrease reported in 10 other Unions	3,960	
	Actual increase	3,753	

During the week ended Dec. 22, the imports of the precious metals were:—Gold, 107,880*l*; silver, 31,152*l*. The exports were:—Gold 104,849*l*; silver, 133,986*l*.

The Bankers' Gazette

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

(From the GAZETTE.)

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 22nd day of Dec., 1869.

ISSUE DEPARTMENT.

	£		£
Notes issued	33,317,350	Government Debt	11,015,100
		Other Securities	3,964,900
		Gold Coin and Bullion	18,317,350
		Silver Bullion	...
	33,317,350		33,317,350

BANKING DEPARTMENT.

	£		£
Proprietors' Capital	14,553,000	Government Securities	13,811,953
Rest	3,092,894	Other Securities	18,088,159
Public Deposits, including Exchequer, Savings' Banks, Commissioners of National Debt, and Dividend Accounts	8,013,647	Notes	10,662,410
Other Deposits	17,319,112	Gold and Silver Coin	916,267
Seven-day and other Bills	500,136		
	43,478,789		43,478,789

Dated the 23rd Dec., 1869. GEO. FORBES, Chief Cashier.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills)	23,155,076	Securities	32,267,112
Public Deposits	8,013,647	Coin and Bullion	19,233,617
Private Deposits	17,319,112		
	48,487,835		51,580,729

The balance of Assets above Liabilities being 3,092,894*l*, as stated in the above account under the head REST.

FRIDAY NIGHT.

The preceding accounts, compared with those of last week, exhibit—

	Increase.	Decrease.
	£	£
Circulation	249,671	...
Public Deposits	1,240,156	...
Other Deposits	79,605	...
Government Securities	...	...
Other Securities	1,510,278	...
Bullion	66,508	...
Rest	7,354	...
Reserve	...	188,122

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Dec. 22, 1869.	Week ending Dec. 15, 1869.	Week ending Dec. 23, 1868.
	£	£	£
Thursday	12,641,000	8,475,000	10,830,000
Friday	11,731,000	9,745,000	13,403,000
Saturday	12,469,000	10,197,000	11,873,000
Monday	11,089,000	10,318,000	8,959,000
Tuesday	10,453,000	9,351,000	10,417,000
Wednesday	8,759,000	27,494,000	9,450,000
Total	67,135,000	75,590,000	64,932,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, Dec. 23, 1869.

The Bank of England return for the week ending Wednesday, the 22nd December, shows as its principal feature the large increase in the Government deposits, and also in the other securities. The return however shows the Bank to be but little influenced by the extra demand for accommodation during the week, the total reserve being less by only 188,122*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz., in 1859 :—

At corresponding dates with the present week.	1859.	1866.	1867.	1868.	1869.
	£	£	£	£	£
Circulation, including bank post bills	21,401,717	22,383,975	23,930,564	23,374,372	23,155,076
Public deposits	9,575,026	8,706,361	7,178,757	6,899,795	8,013,647
Other deposits	18,310,324	18,592,224	18,766,205	17,850,762	17,319,112
Government securities	10,925,157	13,011,222	13,019,203	14,124,874	13,811,953
Other securities	19,686,996	20,241,256	17,518,502	18,339,395	18,088,159
Reserve of notes & coin	10,831,139	12,314,494	13,578,182	10,351,436	11,578,677
Coin and bullion	17,001,740	19,217,859	21,941,047	18,291,621	19,233,617
Bank rate of discount	2½ p c.	3½ p c.	2 p c.	3 p c.	3 p c.
Price of Consols	95⅞ xd	90½ xd	91½ xd	92⅝ xd	92 xd
Average price of wheat	43s 8d	59s 5d	66s 9d	49s 5d	43s 1 d
Exchanges on Paris (short)	25 10 15	25 17½ 25	25 12½ 22½	25 17½ 25	25 15 22½
— Amsterdam ditto	11 13½ 13¾	11 15½ 16½	11 18½ 19	11 19½ 12	11 18½ 18¾
— Hamburg (3 months)	13 5 5½	13 8½ 8¾	13 9¾ 10½	13 10 1 ⅛	13 10½ 11

In 1859, the publication of the French pamphlet, "The Pope and the Congress," had created a great sensation throughout Europe. Money, although only at 2½ per cent., was in good demand. The French funds were falling in consequence of doubts being thrown on the assembly of the proposed Congress, doubts which subsequent events verified.

In 1866, the demand for money was active, at a fraction below the Bank rate.

In 1867, the uncertain aspect of political affairs at home and abroad promoted an uneasy feeling in all departments of trade. There was a good supply of money unemployed, and it was freely offered at about ¼ per cent. below the Bank rate. The rate of interest on India bonds was to be lowered from 4 to 3 per cent. from January 1.

In 1868, the Lord Mayor had granted the summonses against the Overend directors. The difficulty existing between Turkey and Greece had caused a panic in the market for foreign stocks, and a heavy depreciation had taken place in the value of nearly all securities. Cotton had tended upwards in value, but corn had been somewhat inactive.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1859, a deficiency of 6,276,772*l*; in 1866, a deficiency of 1,649,032*l*; in 1867, an excess of 1,247,703*l*; and in 1868, a deficiency of 488,633*l*. In 1869, there is a deficiency of 769,047*l*.

DISCOUNT AND MONEY MARKET.—The last time which we shall have an opportunity this year of referring to the influences which have been at work in 1869 in the discount and money market may be employed perhaps with advantage to show what the movements have been throughout the year in the Bank of England official rate. They have been as follows :—

From 3	to 4	per cent. on the	1st April
— 4	to 4½	—	6th May
— 4½	to 4	—	10th June
— 4	to 3½	—	24th June
— 3½	to 3	—	15th July
— 3	to 2½	—	19th Aug.
— 2½	to 3	—	4th Nov.

At the commencement of the year money ruled at about 2¾ to 2⅞ for 3 months' bank bills, and there was very little change in the rates until the beginning of April, when an advance was suddenly made by the Bank from 3 to 4 per cent., and the market was for some little time unsettled in consequence of a fall in the American exchange, bringing with it the fear that there might be an efflux of gold to that quarter. This was followed in the early part of May by an advance to 4½ in the Bank official minimum, which was brought about chiefly through the introduction of foreign loans and the importation of United States' bonds. The worst however was reached just after the withdrawal of a large amount of gold for Russia, as a result of the frequent loans which had been up to that time introduced upon this market. For some little time the brokers and bankers placed their rates even above the Bank minimum, 4¾ and even 5 per cent. being freely paid for some days for full three months' paper, 5¼ for six months' bank, and 6 to 6¼ for first-class six months' trade. From this point however the fears that any very large and continued absorption of money in this market was impending were shown to be groundless by a steady decline in the rates until July was reached, when the Bank rate was lowered from 3½ to 3, and in the open market 2½ was freely taken by discounters. Since that period the Bank lowered its terms ½ per cent., but raised it again to 3 per cent. on the 4th of November, as the reserve was being somewhat trenched upon. From that period to the middle of December the terms in the open market have been about 2¾, with a tendency downwards if either way, until the usual operations at this season limited the supply. Most quarters it would appear are rather under than over-supplied, except the Bank of England, where consequently there has been more doing latterly. The large distribution of dividends which takes place with the opening of the new year, when viewed in connection with the well-supplied Paris market, justify the belief that no material change will take place in the value of money for the present, although some effect may be produced by the early collection of income and other taxes.

There has been a good demand the last few days, and the terms for short paper have advanced to the Bank minimum in the open market. At the chief establishment a brisk demand has been experienced both yesterday and to-day, and it is expected to continue until the close of the year, after which the previous ease will probably be returned to.

The current quotations for mercantile paper having various periods to run are as follow :—

30 to 60 days	3 per cent.
3 months	3 per cent.
4 to 6 months—Bank bills	3½ per cent.
4 to 6 months—Trade bills	4 4½ per cent.

The allowance for deposits at the joint stock banks and discount houses is as follows :—

Joint Stock Banks	2 per cent.

Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days	2¼	per cent.

The discount quotations current on the bourses of the chief continental cities are as follows :—

	Bank Rate. Per cent.	Open Market. Per cent.
Paris	2½	2¼
Vienna	5	5
Berlin	5	4½
Frankfort	4	3½
Amsterdam	5	5
Turin	5	5
Brussels	2½	2½
Madrid	5	5
Hamburg	...	3
St Petersburg	6½	7

The following are the changes in the Bank of France return for the week :—

Increase.	fcs
Treasury balances	11,600,000
Cash	7,000,000
Bills discounted	2,600,000
Notes	2,400,000
Advances	333,000
Decrease.	fcs
Private accounts	8,900,000

English Government Stocks.—The funds have been without especial feature, the approach of the holidays thinning the attendance of members and checking speculation. A few more sales of money-stock have taken place, but have been counterbalanced by purchases for the account. Consols throughout the week have remained at 92 to 92⅛ for money, and 92⅛ to 92¼ for the January account. New Threes and Reduced, 91⅞ to 92.

Exchequer Bills.—The March issue are 1 lower, at 1 dis. to 4 prem.; and the June show a fall of 2 at par to 5 prem.

Foreign Stocks.—The approach of the Christmas holidays, and the desire which most people feel to limit as much as possible their arrangements at the close of the year, has caused some heaviness in the prices of foreign stocks. Such a period in fact affords a very good opportunity for noting the extent to which certain descriptions have been supported in value by speculation. The markets have been more or less thinly attended latterly, and the operations have been for the most part realisations.

The capacity of the public for absorbing foreign bonds alone, to say nothing of the various colonial, railway, and municipal loans which have been offered upon the market during 1869 for subscription, is shown by the large total which has been added to the list since the close of the year 1868. The nominal amount of the strictly foreign loans which have been launched in 1869 is something over 73,000,000*l*, and so far as can be seen there is every prospect of the total being equalled in 1870. Russia is expected early in the year, and it is said the sum asked for will be a large one, in consequence of which all Russian securities have given way ½ to 1 per cent. Past experience has no doubt shown the Finance Minister that it is better policy to calculate beforehand the amount which may be required to work with with reference to the construction of new lines of railway, and to take a larger loan into the markets of Europe, than to be making such frequent appeals. The latter course weakens the credit of the borrower, if it be only from the fact that people who are always wanting to borrow are looked upon with a certain suspicion, whatever the object may be. Argentine bonds are ¾ higher for the week; Brazilian 5 per Cents., 1865, on the more satisfactory news of late from the scene of conflict with Lopez, have improved 1¼. Egypt 7 per Cents. of 1862, the Viceroy 7 per Cent. Loan, and the Loan of 1868 are each 1 per cent. better. Italian 5 per Cents. of 1861 have gone up 1¼. Peruvian 5 per Cents. of 1865 are ¼ higher. Spanish stocks show a fractional advance. The different Turkish loans are from 1 to 1¼ better, the 1869 scrip being ½ higher at 9-16 to 11-16 premium.

Subjoined are the closing prices of stocks dealt in to-day :—Argentine, 1868, 86⅜ to 86⅝. Brazilian 5 per Cents., 1865, 87⅛ to 87⅜. Chilian 6 per Cents., 1867, 98 to 100; ditto 7 per Cents., 1866, 104 to 105. Egyptian 7 per Cents., 1862, 83½ to 84½; ditto Railway Debentures, 99 to 100; ditto 9 per Cent. Viceroy Loan, 94¾ to 95¼; ditto 7 per Cent. ditto, 82½ to 83; ditto 1868 ditto, 79⅜ to 79⅝. Italian 5 per Cents., 1861, 56½ to 56⅝; ditto State Domain, 85 to 87; ditto Tobacco, 87 to 89. Mexican, 13¼ to 13½. Orel and Vitebsk Obligations, 82½ to 83. Peruvian 5 per Cents., 1865, 84 to 84¼. Portuguese, 33½ to 34; ditto, Scrip, 1869, 1½ to 1⅝ prem.; ditto Paid up, 33½ to 33¾. Russian 4½ per Cents., 89½ to 90½; ditto 3 per Cents., 53½ to 54½; ditto 5 per Cents., 1862, 85 to 85½; ditto Anglo-Dutch, 1866, 91 to 91½; ditto Moscow, 80½ to 81; ditto Nicolas, 65 to 65½; ditto ditto, 1869, 64½ to 65; ditto Charkof, 80½ to 81; ditto Krementschug, 80¼ to 80¾. Spanish New Threes, 27½ to 27⅝. Turkish 6 per Cents., 1854, 80 to 82; ditto ditto, 1858, 65½ to 66; ditto ditto, 1862, 68¼ to 68¾; ditto 5 per Cents., 1865, 45 to 45¼; ditto 6 per Cents., 1865, 68¼ to 68½.

Subjoined is a list of the highest and lowest prices of Consols every day, and the closing quotations of the principal English and foreign stocks last Friday and this day :—

English Railway Stocks.—During the past week some important variations have taken place in these markets. Midland stock has been purchased very largely. One broker is said to have bought over 90,000*l* stock, which amount will be taken off the market at the end of the year. The quotation to-night was 121⅝ to 121⅞, or a rise of about 2 for the week. London and North-Western is ¾ higher at 122⅜ to 122⅝. North-Eastern stocks show a further improvement; "Berwicks" are 1 better at 123 to 123½' and "York," 1¼ at 120¼ to 120¾. Great Northern ordinary stock has also improved 1 to 109 to 110. On the other hand Caledonian stock has been pressed for sale, and has fallen 1¼ to 76¾ to 77. Metropolitan has been largely dealt in, and has given way 1 per cent. to 82⅜ to 82⅝. At one time to-day they were offered by a leading dealer at 81½ for the end of January, but later there was a slight reaction. London and Brighton have receded 1 to 46⅝ to 46⅞.

Subjoined is the usual list of the closing prices of the principal railway shares last Friday and this day :—

AMERICAN SECURITIES.—The gradual diminution in the number of operations in securities which are in favour with the public, as in the case of United States bonds, leads as a matter of course to a little depression. In this department it is scarcely necessary to remind those interested in such matters that these bonds have had a remarkable rise in price during the year—considering the very large amount of them in the hands of the public. On referring to our impression of the 26th of December, 1868, we find that during the week ending on that date the 5-20 bonds of 1882 touched 73½; they are now 85¾ to 86, being an advance of about 12 per cent. To-day the following are the prices—The 1882 bonds are quoted 85⅝ to 85⅞; 1885, 84⅝ to 84⅞; 1887, 83⅞ to 84⅛. The 10-40's, 82⅞ to 83⅛. Erie shares, 17⅝ to 17⅞; and Illinois Centrals, 99¼ to 99¾.

BANKS.—Agra A and B shares are ¼ higher at 10¾ to 11¼ and 4⅝ to 4⅞, and Imperial have improved to a like extent at 16½ to 17. London and County have been in demand, and show a rise of a further 1 at 48½ to 49½. Anglo-Austrian are quoted ½ better at 12 to 12½ prem. Alliance Bank shares, however, have fallen ½ to 12 to 12½. There is but little business, and the inclination is towards higher values.

TELEGRAPH SHARES.—There has been a disposition on the part of operators to curtail transactions, but prices generally have been well supported. The principal alteration in the speculative shares is an advance of 1 in Société Transatlantique Francaise to 15¾ to 15⅞, which at one time were as high as 16, but do not maintain the highest point. British Indian Submarine and Extension shares are both ¼ better at 13¼ to 13½ and ¼ to ½ premium respectively. On the other hand the low price of Atlantic Old stock fails to attract purchasers, and has given way a further 2½ for the week to 10 to 12. Submarine are 5 lower on realisations at 240 to 245.

MISCELLANEOUS SHARES.—Telegraph Construction shares have been bought on the announcement that 4*l* per share will be returned at the close of this year, and show an improvement of ¾ for the week at 35⅝ to 35⅞. Crystal Palace stock is 1 higher at 22 to 24; and Indiarubber and Telegraph Works are 2 better at 29 to 31. In other respects values are much the same.

EXCHANGES.—The features for the year in foreign bill market are few. There has been continued depression in trade, and the instruments by which international dealings are adjusted have, as a matter of course, been scarce. The rates upon those countries which have silver standards, such as Hamburg and Amsterdam, have ranged very high. The rate on Italy at the beginning of the year was 29, 50, and it is now 26, 50, or a fall of 10 per cent. On St Petersburg the rates have been continually falling from 31⅞ to 32 to 29, or a difference of 9 per cent. against Russia. This is owing for the most part to the large issues of paper money, and the great excess of importations over the exportations.

BULLION.—No operations at the Bank to-day. The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The arrivals of gold since our circular of the 16th inst. have been but small, and comprise only:—44,000*l*, per Dover Castle, from Melbourne; 4,500*l*, per Nyanza, from Alexandria; 30,000*l*, per City of Rio, from Brazils; 19,000*l*, per Patagonia, from Valparaiso—total, 97,500*l*. The demand for the Continent has for the moment ceased, and about 62,000*l* has been sent into the Bank. The overland mail is bringing 428,500*l* from Australia; this amount is due here the 1st proximo. The Atrato has taken 50,000*l* to the West Indies, and the Poonah 43,500*l* to Bombay.

Silver.—The market remains without alteration in price at 60½d per oz standard, the demand having been chiefly for the East. The Atrato has taken 10,000*l* to the West Indies, and the Poonah 77,000*l* to Bombay. The Weser has brought 17,000*l*, Doré, from New York, and the City of Rio, 17,000*l* from the Brazils.

Mexican Dollars are firm at the rates quoted below, the amounts coming to hand being so small. The Holsatia has brought 2,000*l*, and the City of Paris 5,400*l* from New York.

Exchange on India for Banks drafts at 60 days' sight remains as last quoted by us, viz., 1s 11½d per rupee on Calcutta, Madras, and Bombay.

India Government Loan Notes show no material alteration from our last quotations. The 4 per Cents. are 91½ to 92; the 5 per Cents., 105 to 106; and the 5½ per Cents., 110 to 111.

Quotations for Bullion.—Gold—Bar gold, 77s 9d per oz std; ditto fine, 77s 9d per oz std; ditto refinable, 77s 11d per oz std; South American doubloons, 73s 9d to 74s per oz, last price. Silver—Bar silver, fine, 5s 0½d per oz std; ditto containing 5 grains gold, 5s 1d per oz std; fine cake silver, 5s 5½d per oz. Mexican dollars, 4s 11½d to 4s 11¾d per oz; five-franc pieces, 4s 11¾d per oz, last price. Quicksilver, 6*l* 17s per bottle; discount, 3 per cent.

POST OFFICE ANNOUNCEMENTS.

A postal convention has been concluded with Greece, under the provisions of which the correspondence between the United Kingdom and Greece will be exchanged exclusively in closed mails, either by French packet via Marseilles, or by the route of Italy. This convention will come into operation on the 1st of January next, on and from which date all letters for Greece will be chargeable, when prepaid, with the following reduced rates of postage (British and foreign combined), viz.:—Not exceeding ½ ounce in weight, 8d; above ½ ounce and not exceeding 1 ounce, 1s 4d; above 1 ounce and not exceeding 1½ ounce, 2s; every additional ½ ounce, 8d. When posted unpaid, the letters will be chargeable on delivery with a rate of 10d per ½ ounce. Registered letters will be chargeable, in addition to the usual postage, with a fee of 4d each. The postage as well as the registration fee must in all cases be paid in advance upon registered letters. Newspapers, book packets, and patterns—Upon every British newspaper, as well as upon all book packets and patterns of merchandise, the postage must be paid in advance, by means of postage stamps, at the following rates, viz.:—Not exceeding 1 ounce in weight, 1d; above 1 ounce and not exceeding 2 ounces, 2d; above 2 ounces and not exceeding 4 ounces, 4d; every additional 4 ounces, 4d. Under the term "book packets" are comprehended periodical works, pamphlets, bound books, prints or maps, whether printed, engraved, or lithographed, and whether on paper, parchment, or vellum; also photographs on paper, parchment, or vellum. No book packet may contain any writing, figures, or manual marks whatsoever. Ordinary corrections in writing will, however, be allowed in the case of book packets containing unbound proof sheets only. No book packet must exceed two feet in length, one foot in width or depth, or three pounds in weight. Patterns or samples of merchandise, of no intrinsic value, may also be sent to Greece at the same rates of postage as book packets, subject to the usual regulations and to the above restrictions as regards size and weight.

On the 1st of January next and thenceforward, the postage upon letters between this country and the States of Ecuador, Bolivia, Chili, or Peru, forwarded via Panama, and whether conveyed by British or French packet, will be reduced from two shillings to one shilling and sixpence for each ½ ounce. As at present, the postage on letters for these States must in all cases be prepaid, or the letters cannot be forwarded.

On the 1st of January next, and thenceforward, the combined rate of British and United States' postage on letters posted in the United Kingdom addressed to any part of the United States, and whether conveyed by packet or by private ship, will be reduced to threepence per half-ounce or fraction thereof, provided such postage be pre-paid. Unpaid or insufficiently paid letters will be liable on their delivery to an additional charge of threepence each, over and above the postage.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The attendance at Mark lane to-day was very small, and the business passing in all kinds of grain was extremely limited. The supplies of English wheat on sale were short, but quite equal to the demand; nevertheless, in all sales concluded the full prices of Monday last were realised. Foreign wheat met a dull retail inquiry at the recent improvement for American and Russian descriptions. Fine malting barley maintained late rates, but inferior and grinding sorts were dull of sale. Very few transactions were reported in either beans or peas, and the quotations were nominal. Flour was without change in value, but the sales were unimportant. The week's imports of foreign and colonial produce into London have amounted to 18,830 quarters of wheat, 11,570 barley, 49,000 oats, 250 sacks and 6,780 barrels of flour.

There has been a fair inquiry in the Liverpool cotton market during the past week, but prices for American descriptions, owing to large supplies, have given way ¼d per lb, while East Indians remain unchanged since Friday last. The total sales for the week (of five days only) are 58,390 bales, of which the trade have taken 44,030 bales; speculators and exporters, 14,360 bales. The imports for the week are 75,696 bales, the actual exports 10,356 bales, and to-day's stock is estimated at 370,407 bales. To-day is a close holiday in the market.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended Dec. 23, 1869:—

	Imported.	Exported.
American ... bales	36,702	1,378
Brazilian	14,912	306
East Indian	37,905	11,568
Egyptian	15,167	39
Miscellaneous	1,383	141
Total	106,069	13,432

At New York on December 23rd, middling Upland cotton was quoted at 25½c per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, November 27:—We are still unable to advise any business in this market. Prices of new Oomrawuttee in the bazaar have declined to 270 rs per candy on time bargain contracts, although there are not any *bona fide* dealers willing to contract at that rate, simply we imagine because they have not as yet commenced operations in the districts. We are glad to be able to report fuller arrivals of old cotton, and as we anticipated, with increasing stocks we find holders of ready cotton are now becoming eager to sell. We reduce our quotation for old Dhollerah 10 rs per candy to-day nominally, but we believe a further reduction would be submitted to if any buyers showed themselves. The total absence of demand at present from all classes of buyers, and the fact that the dealers themselves are acting with equal caution in their dealings out in the districts for new cotton, should tend to lower prices very considerably when the crop begins to arrive at market. We hear some small parcels of Hingunghat are on the way down by rail, but we have not seen large enough samples of the new Oomrawuttee to enable us to report on the quality of the crop. In the Dharwar districts speculators are doing their utmost to keep up prices, and we hear no business is doing, and very little cotton is being sent to the coast. Latest quotations equal 297 rs, f.o.b., at Carwar for Sawginned, but at this rate there were no buyers.

EXPORT of COTTON from BOMBAY to Nov. 26.

	1869.	1868.
London.. .....bales	2,900	3,417
Liverpool	931,810	977,831
Total, Great Britain	934,710	981,248
Channel for orders	14,947	21,885
Continent	165,584	145,816
China	17,468	52,439
Grand Total	1,132,709	1,201,388

Actual exports since last mail left, 3,486 bales.

Messrs E. B. Liddell and Co., of Alexandria, have furnished the following report, dated Dec. 10:—Since our preceding report of 3rd inst. we have had a quiet cotton market, influenced by the less encouraging news from Liverpool, and in some measure likewise by the unfavourable weather prevailing here for the past few days. We have to note a decline of ⅛d to ¼d per lb in the general run of qualities, fine gallin continuing still to be paid very extreme rates. To-day's values are:—Fair to fully fair, 12⅝d to 12¾d per lb, c. and f.; good fair to fully good fair, 13d to 13¼d per lb, c. and f.; good to fine, 13½d to 16½d, ditto.

EXPORTS.

	Great Britain. bales.	Continent. bales.	Total. bales.
From Dec. 3 to Dec. 9, 1869	11,698	2,559	14,257
Previously from Nov. 1	32,596	10,387	42,983
From Nov. 1 to Dec. 9, 1869	44,294	12,946	57,240
— 1868	47,068	14,170	61,238
— 1867	35,198	11,462	46,660
— 1866	36,253	8,108	44,361
— 1865	27,814	5,387	33,201
— 1864	40,328	6,291	46,619

The colonial produce markets have been very quiet during the past week. In tea there has been scarcely anything doing, but prices remain without change. Last week duty was paid in London on 1,370,951 lbs; the exports were 519,175 lbs; and the removals coastwise, 785,851 lbs. The supplies of sugar on offer have been small, especially as regards West India descriptions, and prices for strong refining qualities have been on the advance. Coffees have ruled very firm in value, though the sales have not been extensive.

Messrs J. D. Campbell and Co., of Port Louis, writing on Nov. 19, remark:—Shortly after the mail came in considerable purchases of sugar were made for the United Kingdom and for France at about five to ten cents advance on previous rates, but prices have since receded, and we quote for No. 12 D. S. $5.65 to $5.70, No. 13 $5.75 to $5.80, No. 14 to 14½ $5.85 to $5.90. In yellow sugars there has been no animation, and finest yellow crystals can only be sold at a reduction on last month's prices. Fine yellow counters are however well maintained, and good rations are somewhat dearer. Planters are holding back as much as possible in hopes of better prices until the arrival of the mail. White crystals have been sold at rather lower prices for Bombay, but there is at present a greater appearance of firmness in the market. The want of suitable vessels is an obstacle to large operations. Hitherto the abundance of white sugars has not made itself felt in lower prices as was expected consequent on the very general adoption of Dr Icery's process, and we have no doubt that the large quantity taken by India in the beginning of the season will prevent any glut of white crystals towards its close.

Both privately and by public sale rice has realised full prices, though the demand has been far from active. The English wool market has continued without feature, but colonial wool has changed hands to a fair extent on former terms.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on November 15, remark:—The country has hardly recovered from the effects of the late floods, and wool is coming in very slowly. The chief event of the fortnight has been the sale of upwards of 700 Angora goats imported from Asia Minor, which were eagerly bought up by the farmers, who seem determined to go in extensively for the breeding of goats instead of sheep. There has been brisk competition for the few lots of wool that have come in. Good light grease wools, for scouring purposes, have been bought up at 5d to 5½d per lb, and good fleecewashed parcels have been eagerly sought for. New season's snow-white is worth 14½d to 15½d for prime lots, but little of this description is in the market as yet. Our quotations for wools now obtainable are:—Grease—Full grown, light, and clean, 5½d to 6d; fine, light, for scouring, 5d to 5½d. Fleecewashed—Superior, clean, long-stapled, 8½d to 9½d; good average, 8d to 8½d. Snow-white—Prime, 14½d to 15½d; second quality, good, 13d to 13¾d; country scoured, 10d to 12d.

The annexed is dated New York, Dec. 11.—The wholesale trade of the city continues extremely dull, and the general markets are unsettled. In fancy goods, adapted to the holiday trade, there is some little life, though this department is not so active as in former seasons, being unfavourably affected by the scarcity of money among nearly all classes. The occurrence of additional mercantile failures, here and in the neighbouring cities, during the week, has had a tendency to intensify the prevailing distrust, and it is evident that we shall have no improvement in the commercial situation until the critical turning point of the year has been past. The scarcity of money, in connection with a wide-spread distrust in the stability of values, will explain why nearly all commodities pass slowly into consumption, while as regards the export trade, the position of the gold and exchange markets is such as to preclude a free outlet of our leading surplus staples. The condition of monetary affairs shows little change, and the indications seem to point to no immediate amelioration in the hard features of the discount market. The drain to the West is not quite so large as it has been, and henceforth it is probable that the drafts from that section will become lighter and lighter till the reflex current sets in. The current rates on call loans are 6 to 7 per cent. and on discounts 9 to 15 for high grades of mercantile acceptances, and from one-and-a-half to two per cent. a month for less approved paper.

THE COTTON TRADE.

LIVERPOOL.—DEC. 22.

The demand for cotton has continued good, but the market having been freely supplied, some reduction is made from the quotations of last Thursday. In Sea Island there has been only a small business, but at steady rates. The common qualities continue neglected. American has been abundantly offered, and has given way about ¼d per lb. A quotation of middling fair is now introduced. New York advices to the 22nd instant quote middling 25¼ cents, costing to sell in Liverpool 12⅛d per lb, by steamer. In Brazil a fair amount of business has been done, but with a larger supply a decline has been submitted to of ⅛d to ¼d per lb. For Egyptian the inquiry continues good, and in the early part of the week a slight advance was obtained, but this has since been lost. East India descriptions continue in favour, and, although freely offered, are comparatively steady in price.

In cotton to arrive the transactions have been extensive, at some decline in price. The latest quotations are—American, basis of middling, any port, November-December shipment, 11¼d; December-January, 11⅛d; December-January sailing, 11⅛d; New Orleans, at sea, 11 7/16d; Oomrawuttee, fair new merchants, via Cape, January-February shipment, 9 1/16d; February-March, 9¼d per lb.

The sales of the week (five days), including forwarded, amount to 58,390 bales, of which 7,530 are on speculation, and 6,830 declared for export, leaving 44,030 bales to the trade.

DEC. 23.—The sales to-day will probably amount to about 12,000 bales, the market without change.

N.B.—Saturday and Monday, the 1st and 3rd January, will be close holidays in the cotton market.

The above figures show:—

	Bales.
A decrease of import compared with the same date last year of	322,790
A decrease of quantity taken for consumption of	276,140
A decrease of actual export of	155,990
An increase of stock of	34,560

In speculation, there is an increase of 34,130 bales.

The imports this week have amounted to 75,696 bales. The actual exports are 10,356 bales.

LONDON—Dec. 23.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

There was a good demand for cotton on Friday, at an advance of about ⅛d per lb, but this was somewhat checked on Saturday by advices of heavy receipts at American ports. The market has since been quiet, and we close at about last Thursday's quotations.

Monday next, and Monday, the 3rd January, will be close holidays in the cotton market.

NEW YORK.—DECEMBER 10.

The market for the week has been irregular, closing firm at ⅛c per lb advance from Saturday. Sales for the week, 19,288 bales, including 8,810 bales to exporters, 7,360 bales to spinners, 1,558 bales to speculators, and 1,500 bales in transit. Sales for future delivery have been for the week 11,100 bales, at 24½c to 25c for December, 24⅞c to 25⅛c for January, 24½c to 25½c for February, 25c to 25⅝c for March, and 25⅛c to 25½c for April, all on basis of low middling. Receipts for the week:—Texas, 865 bales; New Orleans, 1,337; Savannah, 4,866; South Carolina, 2,191; North Carolina, 1,707; Virginia, 4,397; Baltimore, 209; railroad, 3,550—total, 19,113 bales. Sales and resales for the week, 19,288 bales. Receipts at this port since 1st September, 251,371 bales. Exports from this port for this week, 14,937 bales; ditto since 1st September, 136,310 bales. Receipts at all United States ports for this week, 100,030 bales; ditto since 1st September, 1,005,000 bales. Stock on hand at this port (estimated), 30,000 bales. The exports of cotton from New York to foreign ports and their value during the week were as follows:—To Liverpool, 11,804 bales, value $1,374,533; to London, 125 bales, value $16,250; to Hamburg, 738 bales, value $94,497; to Bremen, 1,181 bales, value $136,546; to Rotterdam, 182 bales, value $23,368; to Mexico, 104 bales, value $6,030—total, 14,134 bales, value $1,651,224.

The following are the figures showing the receipts and exports of cotton for the week received by Messrs Stokes and Co., from their New York correspondents:—

	1869. Bales.	1868. Bales.	1867. Bales.
Week's receipts at all the ports to Dec. 18	111,000	90 000	106,000
Week's exports to Great Britain	40,000	32,000	49,000
Week's exports to the Continent	25,000	19,000	22,000
Total week's exports	65,000	51,000	71,000
Total receipts at all ports since Sept. 1	1,091,000	375,000	768,000
Total exports to Great Britain, ditto	368,000	258,000	250,000
Total exports to the Continent, ditto	209,000	184,000	107,000
Stock at ports	325,000	250,000	315,000

MARKETS IN THE MANUFACTURING DISTRICTS.

For the time of year the accounts from the manufacturing districts this week are encouraging. Coals have ruled active, and a more than average business has been concluded in iron. Most branches of the hardware trades have been well employed, but cotton and woollen goods have ruled somewhat inactive.

MANCHESTER, Dec. 23.—There is no new feature in this week's business to report different to last. The business is again small, being checked by the firmness of producers who, being still generally under contract, cannot deliver at an early date. Notwithstanding the heavy imports of American cotton and a consequent decline in value, both spinners and manufacturers are still firm at last week's prices, though the tendency is slightly in favour of buyers. The holidays will considerably interfere with business throughout the following week, but we do not anticipate any change of importance for a few weeks.

BRADFORD.—A more cheerful tone pervades the wool market. There is rather more disposition to do business, and some transactions in most classes of wool have occurred. The same improved tone is apparent in both worsted yarns and pieces, though the actual business done is not appreciably increased.

LEEDS.—There were many buyers in the cloth-halls, and among them were some representing Manchester and Scotch houses. Small parcels of goods were purchased, both plain and fancy. Transactions in heavy cloths were of a very exceptional character, nor was there much done in either superfine blacks or black union cloths. There was no alteration as to prices.

ROCHDALE.—Considering the period of the year and the general quietness which has for some time prevailed in both the flannel and cotton trade, a fair amount of business was done in the flannel

market. There was a moderate attendance of buyers, who purchased small selections of plain and fancy goods for immediate, rather than prospective, requirements. Prices were without any material change. Wool, too, though manufacturers are not active buyers, are steady in price.

BELFAST.—Flax—Supplies in the various markets were in excess of previous week. A fair demand generally existed, and prices were in favour of purchasers. Yarns—The slight improvement in demand announced last week continues; still no animation whatever can be reported. Transactions were chiefly on home account. Powerloom—Roughs, light linens for bleaching, and good makes of cloth for dyeing, and Hollands have been in moderate request, at prices previously ruling. Bleached and finished linens—Taking into account the season of the year, transactions on home account have been of a fair average nature. Some orders for the spring trade have been placed.

BIRMINGHAM.—The trade of this town has up to this time been moderately active; they have been tolerably well employed at most of the manufactories, and it is only within the last day or two that orders on account of the home trade have fallen off. The electro-platers report that orders for that class of goods have declined, and the button trade is suffering from the depression prevailing in Lancashire.

WOLVERHAMPTON.—The coal and iron trades of this district present little change since our last notice. The demand for coal and slack is, if anything, a trifle quieter, but prices are firm. Pig iron is in improved request at better prices. Hardwares are steadier.

SHEFFIELD.—In all our principal branches workmen are now well employed. The orders for railway material are generally good, and the armour-plate mills are in active operation. The file trade is very quiet, and some of the large houses are discharging numbers of their hands. The cutlers are generally very well employed, but the saw trade continues as dull as ever. The plating branches are scarcely so busy as usual at this season of the year.

DUNDEE.—In our market for flax goods on the spot there has been little doing, as consumers are now getting their autumn purchases of fresh flax to hand, which keep them off the market. Holders of old flax continue willing sellers, and would submit to some abatement, in order to clear a quantity, but the transactions taking place are quite of a retail character. In tows there has been very little doing, and prices are nominally without change. The yarn market continues much as before. Flax yarns are rather steadier, and rather more has lately been doing in some kinds. Tow yarns continue in fair demand, and prices are maintained. The demand for linens still continues weak and irregular, at unsatisfactory prices, and no improvement is now expected till after the new year, when it is hoped business will become more active. The demand for jute goods continues to be extensive. Jute has continued quiet, and the business doing has been of a limited character.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, Dec. 11.—The flour market continues depressed, and the decline on State and Western brands has made further progress. A slight concession by sellers, and an advance in gold on Wednesday, led to a fair export trade, shippers taking some 4,000 bls choice extra State for Swansea at $5.70, f.o.b., and 2,000 to 3,000 bls for other British ports within the range of $5.50 to $5.70; but since then reduced cable quotations and a relapse in gold combined to cut off margins, and shippers withdrew. The home trade have operated sparingly throughout, as usual on a declining market, and with receipts in excess of the demand and a tight money market, many receivers have been necessitated to realise with the result above noted. Although the close of navigation has limited the receipts, the railroads are bringing considerable quantities, special rates having been made by some lines from Chicago and other points in the West. The sales are 28,000 bls, the market closing dull and unsettled. Southern flour is also lower and dull; sales, 1,200 bls, at $5.50 to $6.20 for ordinary; and $6.25 to $10 for fair to choice. Export of flour from Jan. 1 to Nov. 30, 1869, 1,435,941 barrels, against 1,102,218 barrels in 1868. Export, from 1st to 7th Dec., 1869, 49,302 barrels, against 24,185 barrels in 1868. The receipts of wheat have materially fallen off during the week, but with lower cable quotations there has been a very light demand for export, while millers have held off on account of the depressed condition of the flour market, thus necessitating a decline of 3 to 5 cents to realise, which has been granted by most holders. The sales are 125,000 bushels at $1.17½ to $1.19½ for No. 3 spring, $1.25 to $1.28 for No. 2, closing at the inside price, $1.34 to $1.35½ for No. 1 ditto, $1.30 to $1.36 for amber winter Western, closing with no buyers above $1.32 to $1.33 for prime, $1.27½ to $1.30 for red winter Illinois. California is neglected. Barley is less active and prices favour the buyer; sales, 45,000 bushels, at $1.06 to $1.10 for two-rowed State, and $1.23 to $1.32 for Canada West. The corn market opened dull on Wednesday, with slight concessions in favour of buyers, but subsequently stiffened up a little under the development of some speculative inquiry, closing firm though quiet, at last Tuesday's currency. The demand from the trade has been more than usually light, while exporters continue to be ruled out by extreme prices. Sales 110,000 bushels, closing at $1.11 to $1.12 for sound mixed Western, $1.07 to $1.09 for unsound ditto, $1.14 to $1.15 for yellow Western, $1.06 for white Southern, and 95 to 100 cents for yellow Jersey. Export of corn from Jan. 1 to Nov. 30, 1869, 1,781,088 bushels, against 6,293,914 in 1868; ditto wheat, 17,439,815 bushels in 1869, against 5,581,759 in 1868. Export of wheat from 1st to 7th Dec., 312,699 bushels, against 115,714 in 1868; ditto corn, 4,972 bushels in 1869, against 36,630 in 1868.

EXPORT OF BREADSTUFFS from the UNITED STATES to GREAT BRITAIN and IRELAND since 1st September, 1868.

LONDON MARKETS.

STATE OF THE CORN TRADE DURING THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the business transacted in English wheat, during the past week, has not been by any means extensive, there has been a firm tone pervading the trade, and the belief has become prevalent that prices will not undergo much further reduction, if indeed they have not already seen their lowest point. Nevertheless there are large quantities of foreign wheat on hand, the accumulation in the granaries being very heavy both in London and Liverpool, and it is impossible to look for any decided upward movement until a considerable portion of the produce now in the hands of importers has been worked off. The imports during the past few weeks have continued on a liberal scale, but they have not been so heavy as was the case a short time back, and they may be expected to dimininish as the season progresses. We notice that there still exists a demand on account of the Continent, a feature which is naturally regarded as favourable by speculators, and it is commonly asserted that a considerable portion of the wheat now on passage will be diverted in this manner. There are now afloat for the United Kingdom from the South of Europe and America to ports-of-call, 682 cargoes grain and seed, as against 639 at the corresponding period last year. Of these 371 are wheat, against 327; 173 maize, against 97; 61 barley, against 94; 3 beans, against 16; 30 rye, against 37; 2 oats against 4; 42 seed, against 57. There are also on passage to British ports direct, 76 cargoes wheat (of which 70 are from San Francisco, 5 from New York, and 1 from another port), against 46; 2 maize, against 8; *nil* barley, against 5; 8 cottonseed, against 4. Supplies, though diminishing, are still large, and will be found more than equal to the demands of consumption for some time to come. At the same time it may be remarked that the quality of the available produce is not good, there being little fine Baltic wheat on offer, the accumulation consisting principally of American and Russian descriptions. The few speculative transactions as yet entered into have been confined to fine samples, and these have consequently had a hardening tendency in value.

Continental advices generally bring lower prices for wheat, but the reduction has not led to any important increase in business so far as the export trade is concerned. At present prices there is no margin on shipments to this side, and until some movement takes place in the quotations operations for this market will be suspended. American shippers have done little, but the stocks of both wheat and flour in New York have been on the increase, and prices have tended downwards.

Trade in spring corn has ruled extremely dull. Beans and peas have again been lower where sales have been effected, and grinding barley has been little enquired after. Oats show a reaction of about 6d per quarter on the week. Maize has changed hands to a fair extent on former terms.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last fortnight 45 grain and seed-laden vessels have been reported arrived at ports-of-call,

viz.:—26 wheat, 7 maize, 3 barley, 3 rye, 3 oats, 2 linseed, 1 rapeseed. The floating grain trade continued in a state of inactivity till last Wednesday, when a healthier tone appeared to be gaining ground. Wheat—A fair choice of cargoes has been offering, and several cargoes have changed hands at a decline of 1s to 2s, but the movements of the trade have still been slow. Yesterday the demand became more active. Maize this week was slow to sell at a decline of 3d to 6d from last week's rates, but yesterday the tone somewhat improved. Barley—The sale has also been slow at a decline of 3d to 6d. Rye—Early in the week the Continent bought a couple of cargoes at a slight decline, but yesterday another cargo was taken for the same destination at a recovery of 6d. The reported sales are as follows:—Wheat—22 arrived cargoes: Berdianski, 39s to 40s 3d; Marianopoli, 39s to 39s 6d; Don Ghirka Taganrog, 38s; Ghirka Nicolaieff, 39s 6d to 40s; Ghirka Odessa, 39s to 39s 9d per 492 lbs; Saide, 36s to 37s 6d; Chilian about 44s per 480 lbs; red winter Montreal, 42s 9d, less 2 per cent. Maize—9 arrived cargoes: Moldavian, 29s to 29s 3d per 492 lbs; Wallachian, 28s; Foxanian, 28s to 28s 7½d; Danubian, 28s to 28s 3d; Poti about 26s; Banat, 28s 6d per 480 lbs. Barley—2 arrived cargoes: Wallachian, 23s 6d to 23s 9d per 400 lbs. Rye—4 arrived cargoes: Danubian, 30s to 30s 3d; Wallachian, 31s; Moldavian, 30s 6d per 480 lbs. Linseed unaltered at about last week's prices. 3 cargoes Azow off the coast have been sold; as also 750 tons Calcutta arrived in London at 58s 9d per 410 lbs, A.T.; 2,500 quarters Black Sea ditto, 56s, ex-ship, per 424 lbs, A.T.; and 500 tons Patna, 59s 6d; 100 tons ordinary brown, 58s 9d per 410 lbs. 2 cargoes Azow, off the coast, sold at 56s to 56s 3d per 424 lbs, A.T. Rapeseed firm at last week's prices. 200 tons yellow mixed Calcutta arrived in London sold at 64s to 65s 100 tons; Perozepore, 60s 6d 100 tons; yellow mixed, secondary quality, 63s; and 150 tons, ordinary brown, 61s 9d per 416 lbs, A.T., ex-warehouse. 250 tons common brown, July-August, sold at 61s per 416 lbs, A.T. Cotton-seed steady. 870 tons (2 cargoes) Egyptian arrived, sold at 9*l* 4s 3d to 9*l* 5s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

MINCING LANE, FRIDAY MORNING.

[Business on the various markets has been very small during the past two days, and there will not be any public sales of colonial produce until the 4th proximo.]

SUGAR.—The market is steady, and a good business has been done in West India at stiffer rates, leaving a small supply on offer. Other kinds are rather firmer in consequence. Manila meets with some inquiry at late rates. Sales of West India in three days were 2,170 casks. Barbadoes by auction, 36s to 39s 6d; crystalised Demerara, 44s to 44s 6d; Berbice, 43s 6d to 45s. A cargo of Mauritius has sold for the United Kingdom; also one resold. The statistics of sugar have not undergone any alteration this week. Deliveries are steady, and the stock remains at a moderate point.

Mauritius.—Business has been done in brown by private contract. A floating cargo of 600 tons sold at 29s 3d for the United Kingdom, equal to No. 13.

Madras.—2,000 bags have sold: soft brown, 26s; low Jaggery, 24s 9d.

Penang.—Some business done from last week's sales.

Bengal.—Privately, low brown has sold at 25s 3d.

Natal.—783 bags sold as follows:—Brown, 27s to 33s 6d; grey and yellow, 34s to 36s.

Foreign.—About 400 casks Porto Rico have changed hands privately at 37s to 40s 6d; 28,000 bags Manila clayed at 30s to 32s; unclayed, 26s 9d. A cargo of grainy Cuba sold at 27s 6d per cwt.

Refined.—Dry goods meet a steady inquiry.

MOLASSES.—Small sales at previous rates.

RUM.—About 250 puncheons Penang have sold at 1s 8½d; small sales of Demerara, at 2s 3d Leewards, 2s 1d per proof gallon. The total stock is 4,200 puncheons less than at same date last year.

COCOA.—There have not been public sales. Any business done privately is not reported, and the market remains quiet.

COFFEE.—A good demand prevails for plantation Ceylon, and several contracts have been made at firmer prices. The total stock in London is still large, viz., 24,130 tons, against an average stock of 16,350 tons in the three previous years. 143 bales and half-bales small greenish berry mocha sold at 102s to 105s per cwt. The public sales of plantation Ceylon have been too small to quote.

TEA.—The market has been very quiet, and the trade have taken small supplies. Prices steady. Common congou quoted, 1s 0½d per lb. Business may be considered closed for the year.

RICE.—At the public sales 998 bags Bengal were taken in at 9s 6d to 10s for broken white. 13,210 mats Siam were bought in at 9s. Privately 7,500 bags sold: white Bengal at 9s 6d to 12s; low cargo kind, 7s 7½d cash. A cargo of Bassein sold at 8s 9d per cwt, ex ship, for London.

IMPORTS and DELIVERIES of RICE to Dec. 18, with STOCKS on hand.

	1869.	1868.	1867.	1866.
Imports ....tons	78820	71700	25400	40370
Deliveries	60170	54450	38100	43830
Stock	51350	33840	17150	26050

SPICES.—At the public sales 597 bags Penang black partly sold at firmer prices, from 4d to 4½d. Privately a few sales have been effected on similar terms. White is rather easier. 209 bags Singapore by auction sold at 5½d per lb. Cloves meet with some inquiry: Zanzibar, 3d per lb.

SALTPETRE.—The market has become quiet, but find quotations are firm. 150 tons Bengal sold afloat at 22s 9d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Dec. 18, with STOCKS on hand.

	1869.	1868.	1867.	1866.
Imported ....tons	11140	7050	9140	12070
Total delivered	10680	10920	11370	9800
Stock	4650	4270	8515	10350

DRYSALTERY GOODS.—Turmeric steady. Bengal has sold at 21s on the spot and afloat. Business has been done in Gambier at 16s 9d, ex ship. 72 bales Bengal safflower part sold at 12*l* 2s 6d to 12*l* 12s 6d per cwt. A good business done for arrival. Cutch firm: fine Pegue in boxes sold at 25s per cwt.

METALS.—The few sales effected this week have not altered general quotations. Chili copper steady at 66*l* 5s to 66*l* 10s. Other kinds are nominally unaltered. The iron market maintains the late improvement. Scotch pig after advancing to 58s 10½d fell to 58s per ton cash. Tin dull. Straits, 110*l* to 111*l* per ton. Spelter quiet at last week's quotation. A sale of common plates reported at 19*l* 15s.

HEMP AND JUTE.—Transactions have been upon a small scale only, and prices are the same as last quoted. Petersburg clean, 35*l* to 35*l* 10s per ton.

TALLOW.—Prices of Russian have been influenced by speculative operations in settlement of contracts. A decline of 9d to 1s has occurred, and the market is still rather quiet. Petersburg Y.C., 44s 9d to 45s, according to date of delivery; October to December, about 46s per cwt.

OILS.—Common qualities of olive continue in steady demand, on the spot and afloat. English brown rape meets a moderate inquiry, at 38*l* 10s to 39*l* 10s, according to date of delivery. Linseed is rather higher but quiet at the close, at 29*l* 10s here. Cocoa-nut steady at last week's rates. Ceylon, 41*l*; Cochin, 43*l* to 43*l* 10s. The market for palm remains inactive. Fine Lagos quoted 40*l* 10s per ton.

PETROLEUM.—American refined, 1s 8d to 1s 9d per gallon.

LINSEED.—A fair demand prevails for Calcutta, at 58s 9d. Black Sea cargoes on the coast sold at 56s to 56s 3d per cwt.

PARTICULARS OF TALLOW.—Monday, Dec. 20, 1869.

	1866. casks.	1867. casks.	1868. casks.	1869. casks.

Price of Town	45s 9d	44s 3d	50s 0d	48s 0d

ADDITIONAL NOTICES.

REFINED SUGAR.—The home market remains steady, but little doing. Dutch crushed continues firm, at previous rates.

GREEN FRUIT.—A lively demand exists for all kinds; the market being amply supplied for Christmas and prices being moderate, the trade have taken stock freely. The supply of oranges from the Azores, Spain, Portugal, and Sicily, has been large; some parcels of which, sold by Keeling and Hunt at public sale, went at previous rates. The sale of Almeria grapes is dull, but prices well sustained. A good trade doing in black Spanish and Barcelona nuts.

COLONIAL WOOL.—Market very firm; fair inquiry for time of year.

FLAX.—Market dull.

HEMP.—Market steady at the quotations.

SILK.—Prices very firm, but market rather inactive.

TOBACCO.—The market has presented a very quiet appearance, which, under ordinary circumstances, is usually the case at this period of the year. Sales generally of a limited character to supply immediate requirements. Prices steady and unchanged. Substitutes in fair demand at previous rates.

LEATHER AND HIDES.—The trade in leather has been generally of a limited character during the past week. At Leadenhall on Tuesday there was a short supply of fresh goods, and the demand in most cases

was quiet. Light English bellies and shoulders and English horse hides are the articles the most scarce and in request. Prices are unaltered.

METALS.—There has been little doing this week. Copper has been done in to a moderate extent and closes steady. Iron is well maintained. Tin has been drooping in price, and very little sold. Lead is fairly maintained. Spelter and tin plates are very dull.

TALLOW.—Official market letter issued this evening:—

	s	d
Town tallow	46	6
Fat by ditto	2	3½
Yellow Russian ditto	47	0
Melted stuff	33	6
Rough ditto	18	0
Greaves	17	0
Good dregs	6	0

METROPOLITAN CATTLE MARKET.

MONDAY, Dec. 20.—The total imports of foreign stock into London last week amounted to 7,918 head. In the corresponding period in 1868 we received 3,926; in 1867, 7,614; in 1866, 8,935; and in 1865, 11,703 head.

As usual, at the market immediately following the great day, the supplies of both beasts and sheep were limited, the wants of butchers having been met by the large arrivals of last week. The show of foreign stock comprised some very fair French and Dutch beasts; but the trade ruled very quiet, and prices had a decidedly downward tendency. From our own grazing districts the arrivals were limited in number, but a good proportion consisted of fat stock of the usual Christmas character. Some prime Scots came to hand; but even the best beef met with little inquiry, and the quotations gave way 4d per stone as compared with last week, the top price not being above 5s 6d per 8 lbs. The number of sheep in the pens was very short, and there was a fair inquiry for choice mutton; prices consequently advanced 2s per 8 lbs, the top figure for best Southdowns and half-breds being 6s per 8 lbs. In the value of inferior sheep no change took place. Veal and pork met a quiet sale at the quotations annexed.

SUPPLIES ON SALE.

	Dec. 21, 1868.	Dec. 20, 1869.
Beasts	2,480	2,128
Sheep	11,840	10,340

HOP MARKET.

FRIDAY, Dec. 24.—The hop market has been without a feature of importance. The demand has not been active, but prices have been well maintained. Mid and East Kents, 7*l* to 12*l* 12s; Weald of Kents, 5*l* 5s to 7*l* 15s; Sussex, 5*l* 10s to 7*l*; Bavarians, 7*l* to 11*l*; French, 4*l* to 8*l*; Americans, 5*l* 10s to 7*l*; Yearlings, 2*l* 10s to 5*l* 5s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Dec. 24.—These markets have been fairly supplied with potatoes. The trade has been rather more active, at our quotations:—English Shaws, 70s to 80s; Regents, 70s to 90s; Rocks, 65s to 70s; Scotch Regents, 75s to 100s; and French, 60s to 70s.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Dec. 24.—Our market has been very quiet this week, and we do not expect much activity before the close of the year, as at this season buyers do not like to increase their stocks to a greater extent than is absolutely necessary. Prices maintain a pretty firm tone.

CORN.

(FROM OUR OWN CORRESPONDENT.)

WAKEFIELD, Friday, Dec. 24.—The show of wheat was limited, and the finest sorts of red were 1s per quarter higher. Not much change in other kinds. Barley as before.

The Gazette.

TUESDAY, December 21.

EPITOME OF RAILWAY NEWS

TRAFFIC RECEIPTS.—The traffic receipts of railways in the United Kingdom for the week ending Dec. 12 amounted, on 13,569 miles, to 750,306*l*, and for the corresponding week of last year, on 13,414 miles, to 727,572*l*, showing an increase of 155 miles and of 22,734*l*. The gross receipts on 14 of the principal railways amounted, for the week, on 9,895 miles, to 628,259*l*, and for the corresponding week of 1868, on 9,754 miles, to 612,627*l*, showing an increase of 141 miles and of 15,632*l*. The total receipts for the week show a decrease of 318*l*, as compared with those of the preceding week, ending the 5th of December.

RAILWAY AND MINING SHARE MARKETS.

LONDON.

MONDAY, Dec. 20.—The share markets to-day were steady throughout, and the only changes recorded in the official list were:—In colonial and foreign railway stocks, a rise of 1 in Northern of Canada (6 per cent. Preference Bonds), ½ each in Eastern and Southern of France, ¼ in Lombardo-Venetian, and 2½ in Erie (3rd Mortgage), a fall of ¼ in Mexican, and a further ⅛ each in Erie (Original) and Atlantic and Great Western (Consolidated). In mines and banks, a further fall of ½ in Great Laxey, and a decline of ½ each in Great Wheal Vor and Bank of Australasia, and a rise of ¼ and ½ respectively in Agra (New) and London and South African. In telegraphs, Anglo-American were ½ lower, Submarine 5, and Atlantic a further 1, Electric and International were 2 better, and Falmouth and Malta a further ½. In miscellaneous, Fore Street Warehouse were ½ lower, and Hudson's Bay ½, Foreign and Colonial Government Trust were 1 better, and Universal Marine (Insurance) and Viceroy of Egypt's (7 per cent.) Loan ½ each.

TUESDAY, Dec. 21.—The transactions in the share markets to-day were unimportant, and the closing quotations showed but few alterations. In colonial and foreign railway stocks, a decline of ½ in Great Western of Canada, a relapse of ¼ in Lombardo-Venetian, and a recovery of ½ in Atlantic and Great Western (Consolidated). In mines and banks, a fall of ¼ each in East Caradoc and Cape Copper, and a rise of ¼ in Assheton, and ½ in London and County. In telegraphs and miscellaneous, a decline of ⅛ in Submarine Scrip, an advance of ¼ each in Anglo-Mediterranean and Telegraph Construction, ¼ in Ebbw Vale, and 2½ in Indiarubber Telegraph Works, and a fall of ½ in General Steam Navigation.

WEDNESDAY, Dec. 22.—The share markets to-day were dull throughout. The changes officially recorded were:—In colonial and foreign railways, a rise of ½ each in Scinde (Delhi) and Buenos Ayres Great Southern, ¾ each in Dunaburg and Witepsk and ditto (registered), and ¼ in San Paulo, a fall of ½ each in Northern and Southern of France and Paris, Lyons, and Mediterranean, ¼ in Ottoman (Smyrna to Aidin), and a further ¼ in Lombardo-Venetian. In mines, a decline of 1 each in Great Laxey, Margaret, and Tin Croft, ½ in Great Wheal Vor, and 1-16 in Rosa Grande (14s paid); an advance of 5 in Wheal Seton, ½ each in Alamillos and Australian United Gold, and 1-16 in Frontino and Bolivia Gold. In telegraphs and miscellaneous, British Indian Extension advanced ½, Falmouth and Malta were ½ lower, Submarine 5, City Offices ½, Imperial Continental Gas, Natal Land, and Peninsular and Oriental steam 1 each, Italian Irrigation and Rio Gas ¼ each, and Thames and Mersey Marine (Insurance) ½; Bombay Gas (New) were 1-16 better, Credit Foncier of Mauritius ½, General Credit and Oriental Gas (New) ⅛ each, London Financial 1, and Telegraph Construction a further ¾; India Rubber Telegraph Works relapsed 1.

THURSDAY, Dec. 23.—In the share market to-day colonial railway stocks and mining, bank, and telegraph shares, and miscellaneous securities were firm at an average improvement of about ½, while foreign were dull. The changes officially recorded were:—A rise of ½ in Scinde (Delhi 20*l* shares), ½ in Bombay and Baroda, 1 in Buffalo and Lake Huron (preference), 4 in Buffalo and Goderich, and ¼ in Grand Trunk of Canada (Second Preference Bonds); a fall of ¼ each in ditto (Fourth Preference Stock) and Erie, and ½ each in Namur and Liege and Atlantic and Great Western (Consolidated), and a relapse of ¼ each in Dunaburg and Witepsk, and ditto (registered). In mines, a further decline of ½ each in Great Laxey and Great Wheal Vor, a fall of ½ in Chontales, an advance of ½ each in Capula Silver and Panulcillo Copper, and a recovery of ½ in Rosa Grande. In telegraphs and miscellaneous, Submarine recovered 5, and ditto (Scrip) ½, British Indian declined ½, and ditto (Extension) further advanced ½; French Cable were ¾ better, Bolckow-Vaughan 1.

FRIDAY, Dec. 24.—Foreign bonds were steady at the annexed prices. Turkish were the only class that were in any way in demand, being ½ stronger. The scrip of the new loan was quoted ½ to ⅝ prem. The bonds of the Honduras Railway loan, 85 to 86. The scrip of the new Danubian Railway loan, 1½ to 1¾ prem. Beyond a fair purchase of Midland shares, which were ¼ better, there was little or no dealing in the market for English railway shares, but prices were fairly supported. Transactions in American securities were restricted; but Erie shares were ½ better. Erie, 17 to 17½.

LUDGATE HILL and OLD BOND STREET.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children, there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

ARTIFICIAL ADAMANTEAN TEETH.—Mr F. Eskell, Dentist, of 25 Hanover square, has invented the method of fixing teeth by atmospheric pressure, that to remove would be impossible except at the will of the wearer. Fixed without the slightest pain or removal of stumps. A set of teeth, £5; single tooth, 5s. Mr F. Eskell's new works on the teeth: "Scientific and Painless Dentistry," being a popular exposition of the dentistry of the present age, sent post free 12 stamps; also "The New System of Dentistry," eighth edition, 6 stamps. Consultations free.

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring, so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s, 21s, 26s 6d, and 31s 6d; postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage, 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT.
ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c. They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.

WHITE, MANUFACTURER, 228 Piccadilly, London.

BANK OF CALIFORNIA.—THE ORIENTAL BANK CORPORATION are prepared to issue Drafts at sight on the Bank of California San Francisco, the terms for which may be ascertained at their office.
Threadneedle street, April, 18

DIRECTORS.
The Right Hon. Edward Pleydell Bouverie, M.P., President.
Charles Morrison, Esq., Deputy Chairman.
James Hutchinson, Esq. | W. Gordon Thomson, Esq
Ashley Carr Glyn, Esq. | T. M. Weguelin, Esq., M.P
BANKERS—Messrs Glyn, Mills, Currie, and Co.
This Company was the first established in England for the purpose of receiving, upon the security of a large subscribed capital, money on deposit at a fixed rate of interest, and lending the same, together with the paid-up capital, on mortgages of real estate in Canada. The Company has been in successful operation since 1851. The Directors are now issuing debentures, for 3 years at 4½ per cent., and for 5 years and upwards at 5 per cent. interest, payable at Messrs Glyn, Mills, Currie, and Co., on 1st January and 1st July. Any information required can be obtained on application to F. PEARON, Secretary.
No. 7 Great Winchester street buildings, London, E.C

Messrs ALLSOPP and SONS take the opportunity of announcing to private families that their Ales, so strongly recommended by the medical profession, may be procured in Draught and Bottles, genuine, from all the most respectable Wine and Beer Merchants and Licensed Victuallers, on "ALLSOPP'S PALE ALE" being specially asked for.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for thirty years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion; and as the best mild aperient for delicate constitutions, especially adapted for ladies, children, and infants.
DINNEFORD and CO., Chemists, 172 New Bond street, London, and of all other chemists throughout the world.

LEGAL & GENERAL LIFE ASSURANCE SOCIETY,

10 FLEET STREET, TEMPLE BAR, LONDON, E.C.

TRUSTEES.

The Right Hon. The Lord Chancellor.
The Right Hon. The Lord Cairns.
The Right Hon. Sir W. Bovill, Lord Chief Justice, C.P.
The Right Hon. Sir Edward Vaughan Williams.
The Hon. Sir George Rose.
Thomas Webb Greene, Esq., Q.C.
John Osborne, Esq., Q.C.
Edward Smith Bigg, Esq.
Robert Bayly Follett, Esq., Taxing Master in Chancery.

FINANCIAL POSITION ON JANUARY 1st, 1869.

Existing Assurances and Bonus	£4,650,000	Invested Funds	£1,540,000
Annual Income	200,000	Claims and Bonus paid	1,650,000

Annual Accounts have always been published in full detail.

SECURITY.—The Assurance Fund amounts to no less than seven times the total annual income. The further guarantee of a fully subscribed Capital of £1,000,000.

WHOLE-WORLD Policies granted for a single extra payment of 10s per £100, where no Special Liability to Foreign Residence then exists. Policies on Lives of full age when Assured, after Five years' existence without incurring extra charge for Foreign Licence, allow *unrestricted residence* in any part of the world.

NINE-TENTHS of the total Profits divisible every Five years amongst the Assured. A valuable provision for Policies becoming Claims between two divisions. Very moderate Non-Bonus Premiums.

The GENERAL CONDITIONS of Assurance printed thereon are specially framed to secure to Policies of the Society, when once issued, absolute freedom from all liability to future question.

LOANS are granted on Life Interests or Reversions.

E. A. NEWTON, Actuary and Manager.

NORTH BRITISH AND MERCANTILE INSURANCE COMPANY.
Incorporated by Royal Charter and Acts of Parliament.
FIRE DEPARTMENT.

Policies should be renewed within fifteen days from the 25th instant. Receipts may be had of the various Agencies and Branches, and at the Head Office.
London, 61 Threadneedle street, E.C.
— West-End Office, 8 Waterloo place, S.W.
December, 1869.

THE THAMES AND MERSEY MARINE INSURANCE COMPANY (Limited.)

Notice is hereby given, that the Transfer Books of this Company will be Closed from 1st to 14th January, 1870, both days inclusive.

The Interest Warrants for the half-year ending 31st December will be forwarded to the Proprietors whose names are registered in the books of the Company on that date.

No Transfers will be received while the books are closed.—By order, P. MAUGHAN, Secretary.
1 Royal Exchange Buildings, London, E.C.

LIFE ASSURANCE.—THE TERMS of the SCOTTISH PROVIDENT INSTITUTION are submitted to those who may be desirous of assuring, and they are specially applicable to persons requiring to Transfer their Assurances. No scheme which has been proposed, or is at all likely to be proposed in connection with Transfer, offers equal advantages to good lives

Subsisting Assurances, 6¼ millions. Accumulated Funds, from its own moderate premiums alone, above £1,600,000.

The financial position of the various offices is shown in the "Insurance Register," lately published by Kent and Co. The institution's reports, with statement giving Balance sheet, Investments, Receipts and Disbursements, &c., may be had on application at the London Office, 18 King William street, E.C.; or at the Head Office in Edinburgh.

JAMES WATSON, Manager.
Edinburgh, December, 1869.
The Books Close for the year on the 31st instant.

NORTHERN ASSURANCE COMPANY.
Established 1836.
Incorporated by Act of Parliament.
Capital—Two Millions.

Annual Revenue from Life Premiums—£110,000.
Life Reserve (exclusive of Annuity Fund)—£655,000.
Total Accumulated Funds (wholly invested in first-class Securities) as per last Report—£940,000.
Annual Revenue from Interest thereon—£42,000.
Office in London—1 Moorgate street.

The Directors invite attention to the following facts, in support of this Company's claims to public confidence:—

I. The liability of the shareholders for payment of every contract of the Company is unlimited.
II. The total expenses of management of the Life Department are only a little over 8 per cent.; or, excluding Commission paid to Agents, less than 4 per cent. upon the revenue.
III. The whole profits of the Participation Branch are divided amongst the assured.
IV. The Company estimates its future liabilities by a pure Carlisle 3 per cent. valuation (except in respect of a few of the older policies whose premiums were founded upon a 4 per cent. table, at which rate they are valued), without anticipating any portion of the "loading" made to its premiums for expenses and profit.
V. The Company publishes its accounts (including full details of the investments) in a form which enables every ordinary man of business to judge for himself of its financial position, besides affording professional actuaries the means of testing with precision the sufficiency of its reserves to meet future liabilities. Copies of these may be had by application at any of the Company's offices or agencies.

A. F. FLETCHER, General Manager.

NORWICH UNION FIRE INSURANCE SOCIETY. Instituted 1821. The rates of this Society are the same as other offices, while periodical returns have been made to the parties insured amounting to £392,430.

This office is distinguished by its liberality and promptness in the settlement of claims, £2,379,384 having been paid to insurers for losses by fire.

In proof of the public confidence in the principles and conduct of this establishment, it will suffice to state that the total business now exceeds £36,000,000.

No charge is made for policies; duty repealed.
Offices—50 Fleet street, E.C.; and Surrey street, Norwich.

HAND-IN-HAND FIRE AND LIFE INSURANCE SOCIETY.
1 New Bridge street, Blackfriars, London, E.C.

The oldest Insurance Office in existence. Founded and still conducted on the Mutual System.

Large returns made to members in each department. The whole of the profits are divided annually amongst the Members of Five Years' standing and upwards—there being no shareholders.

The rate of abatement of Premium thereby given for the current year on Life Policies is 60 per cent. for the Old Series, and 50 per cent. for the New Series.

The rate of return on Septennial Fire Policies (charged at 1s 6d per cent.) is 66 per cent.

The Directors are willing to appoint as Agents persons of good position and character.

24th DECEMBER, 1868.

Agriculture.

YEARLY TENANCY AND GAME.

A RENEWED WARNING TO FARMERS.

Every impartial observer knows that the game laws, with its incidents, constitutes a most irritating and inveterate ulcer on our body politic. And there can be no doubt that everyone who lays bare before the eyes of the community any striking example of the disease is preparing the way for an efficient remedy, and so becomes, in a sense, a public benefactor. Now it seems that the Duke of Portland has recently furnished the means of a benefit of this sort.

We have, again and again, had occasion to comment on the injury and wrong sustained by tenant-farmers under and through the game laws and game preservation, and to expose the absence of rational motive supplied by the fondness for battue shooting on the part of the landlord for such inflictions on his tenant. But in such cases, although there may have been no rational or sufficient motive on the part of the landlord for such injurious reservation of the game, still he had *a* motive in his personal liking for the slaughter of semi-wild creatures. In the case we are about to mention no such motive seems to exist, for the game preserving power reserved by the landlord from his tenant, by which that tenant was injured, was made over gratuitously to an attorney and five other persons of Mansfield, calling themselves "The Mansfield Game Association."

These people it appears appointed a gamekeeper, who of course exercised all the powers of petty annoyance which such functionaries invariably exercise over the occupying farmers, and the results were the ordinary ones of vexation, quarrels, and bad blood.

One of the tenants subjected by the Duke of Portland to the tender mercies of the "Mansfield Game Association" was Mr Dickons, who occupied two considerable farms, High Oakham and Fulton Grange—both large farms—in the County of Nottingham. The former farm had been occupied by Mr Dickons for twenty years, the latter for sixteen years, and this farm had previously been occupied by members of his family.

Mr Dickons was a man of capital. He was an enterprising and skilful farmer. But he can scarcely have been called a prudent man; for while submitting to the reservation of the game to the landlord, and consenting to hold the farm as yearly tenant, he so invested his capital, and so applied his agricultural skill, that when in August, 1867, he received a notice to quit his farms at Lady-day then next, he sustained a loss of 700*l* by the forced sale of his stock, and a further loss of 900*l* in the improvements he had made on the farms, and which he was compelled to leave behind him without any compensation. Now the Duke of Portland being what is called a "good" landlord—*i.e.*, a man believed to be incapable of misusing the power he retains over his yearly tenants—such an occurrence would seem to be almost incredible.

But it happened in this way. The gamekeeper of the "Mansfield Game Association" reported to his masters that Mr Dickons interfered with *their* game which *he* fed; the game preservers wrote to Neale, the Duke's steward, a letter of complaint against Mr Dickons, founded on the report of their gamekeeper; and Neale, the steward, having asked *his* master, the Duke, "to support him in some strong measures," received directions from the Duke to serve the notice to quit, whereby Mr Dickons has suffered so severely from putting his trust in a "good" landlord.

All this and much more was given in evidence at the Leeds Assizes, where an action for libel at the suit of Mr Dickons against the six persons constituting "the Mansfield Game Association" was tried. The libel was contained in the letter addressed by the game-preserving attorney and his associates to Neale, the steward, that letter having been sent to Mr Dickons with the notice to quit, as an intimation, we presume, of the ground of his summary dismissal from his farms. The jury found a verdict for Mr Dickons, and gave him 500*l* damages, which certainly must be considered to be very moderate.

The report of this trial in the daily papers should be read and carefully marked and digested by every tenant-farmer in England. He will draw from it these lessons—(1) That there can be no security for a yearly tenant who farms otherwise than from hand to mouth; (2) that the reservation of game from the tenants is made, not merely because the landlord wishes to disport himself in the slaughter of game, but as a sign of the semi-feudal subjection of the tenant. Else why should not the Duke of Portland have given the game to his tenants rather than to the Mansfield attorney and his associated game preservers? There is not the shadow of a doubt that the feeling stated before the Game Law Committee in 1846 to be entertained by a landowner then named, "that nothing on earth should induce him to let the game on their farms *to the tenants*," is generally entertained amongst the larger landowners.

The case of Mr Dickons, delivered over by his landlord to the game depredations of the "Mansfield Game Association," will not be without its effect on public opinion.

AGRICULTURAL STIPULATIONS AND LAND MANAGEMENT.

There are signs that a better time is coming for the English farmer. We refer to the various methods and the differing quarters in which his interests are noticed. It is the diffusion of such things rather than their individual importance which is to be regarded as so hopeful. For instance, in the following passages from a letter on "farm agreements" in *The Field*, "a country gentleman's paper," there is nothing new, nothing not well known to all who regard the actual state of English husbandry without prejudices.

The writer (in whose initials we detect a very able land agent) refers to an "outrageous agreement" referred to in a preceding number, and to an editorial remark attributing the monstrous document to lawyer draftmanship.

On this point the writer says justly,—"As as a rule lawyers confine their attention to the legal portion of such agreements, receiving their instructions as regards covenants for cultivation from land agents.....In my opinion, land agents (not lawyers) are blameable for the insertion of improper covenants in farm leases and agreements." And he attributes this to the want of agricultural knowledge on the part of many land agents. We would however add that these mischievous covenants are quite as much due to the desire of agents to pander to the prejudices of their landlord employers, and amongst whom the prevalent feeling is a suspicion of a dislike to independence in tenant-farmers. That the farmers are themselves much to blame for their own subservience we shall presently cite a striking instance.

The *Field* correspondent fully recognises the necessity of independence. He says:—"The primary considerations are equitable covenants, judicious expenditure, and good management. Without these no man can farm with profit to himself, nor with justice to the land in his occupation.. .....Let agriculturists, as manufacturers of food for the million, have the assurance that whatever improvements they may effect in manufacturing their produce shall be *for their own benefit* as well as that of their landlords, and their progress will be rapid also."

Now to good cultivation security for outlay is a *sine qua non*. Without security the tenant-farmer struggles on under the greatest disadvantage. As "G. A. D." truly says—"The cost of good cultivation is but little in excess of bad, and that it is on the increased produce grown that the farmer's profits are greatest, as on this produce neither rent, rates, taxes, nor costs of management have to be paid." But though the extra cost of good over bad cultivation may be said in a sense to be small, all that extra expense is incurred in such modes as to require time and security of possession. It is just such outlays as render the farmer liable to loss by reason of want of a lease, or from absurd or stringent covenants.

Literature.

A History of the Abyssinian Expedition. By Clements R. Markham, F.S.A. Macmillan and Co. 1869.

The reader who wishes to gain an intimate knowledge of our late campaign in Abyssinia will not be hindered by any lack of material. The expedition which terminated so grandly at Magdala has produced indeed a heap of useless books manufactured for the market, but it has also produced a vast amount of information conveyed through newspapers, reviews, and magazines, and a few works which deserve to be classed as literature. Among these a foremost place must be awarded to the volume before us.

Mr Markham's history sweeps away a considerable amount of lumber. He has done well what many other writers have done indifferently. He has told a splendid story clearly, honestly, and fully, and if his style be deficient in the vigour and poetic glow which such a theme would justify, it possesses the merits of manliness and simplicity.

The history of the expedition is preceded by a history of the country, and a sketch of the work achieved by Abyssinian travellers, of whom the greatest and most trustworthy is James Bruce, and one of the earliest Father Alvarez. This portion of the volume, although useful and perhaps indispensable, need not detain the reviewer. Neither is it necessary to dwell on the events which compelled England to send her soldiers into the country, except for the purpose of observing that Mr Markham is careful to throw the blame on the right shoulders. He considers that the memory of Consul Plowden has been most unjustly treated; he hints that Captain Cameron had too generous

a nature for a modern British Consul, "whose first duty is not to protect oppressed Christians, but to keep everything quiet and to encourage trade;" and he remarks that if an answer had been returned to King Theodore's letter, in which he proposed to send an Embassy to England, "there would never have been any reason for spending several millions on an Abyssinian expedition." It is curious by the way that Earl Russell—whose weakness as a statesman has ever been too great a love of despatches and of letter-writing—should have left unanswered one of the most important letters he could have received during his career at the Foreign Office. To the great leader of the force Mr Markham is we think barely just. His admiration of Colonel Merewether is great, and he apparently considers that to this officer the management of the expedition ought to have been entrusted. With such a feeling it is perhaps natural that he should disparage the achievements of Lord Napier. Mr Markham rarely if ever awards direct blame to the conduct of the Commander-in-Chief, but he often hints that it was ill-advised or had been rendered unnecessary by the previous operations of the political resident at Aden. He asserts that through the whole course of the Abyssinian difficulty, from the imprisonment of Cameron to the release of the prisoners in the spring of last year, "Colonel Merewether has been the life and soul of all the measures which have terminated in such complete success—first, in negotiation, until that resource was exhausted; and then in the political conduct of the expedition." In another place, he states that in Colonel Merewether's opinion only 6,000 men were required, whereas "the Commander-in-Chief of the Bombay army reported that in his opinion 12,000 was the smallest number that it would be safe to employ.....and his ideas respecting the accumulation of provisions were on an equally extensive scale." Mr Markham considers that by the time Sir Robert Napier arrived upon the scene most of the difficulties had been overcome, and that "the heat and burden of the day was over," a remark which is assuredly not borne out even by his own statements. And here it may be well to quote a significant passage, in which the most important decision of the Commander-in-Chief is clearly and fairly stated:—

When Sir Robert Napier landed on the 7th of January upwards of 7,500 troops had already arrived, and the Commissariat Department had provisions at Mulkutto for 2,000 European troops for three, and for 7,000 native troops for six months. Two courses were then open to him in the conduct of the campaign. It might have been decided that the great object was to intercept Theodore in his flank march before he reached Magdala, and so prevent the prisoners from again falling into his power. Mulkutto is but thirty easy marches from Magdala, and, even if the march had not been commenced until the end of January, a small force pushed vigorously forward would have obtained the object in view, provided that the King stuck by his guns and did not abandon them in order to secure his retreat to Magdala, which place he could have reached in a few days at any time by forced marches without *impedimenta*. But the General commanding must to a great extent have relied on the resources of the country both for supplies and transport; and temporarily, until supports could be brought up, on the friendliness of the people for keeping communications open with his base. The alternative plan—the plan on which the campaign was actually conducted—allowed Theodore to reach Magdala at his leisure, with all his guns, and thus placed the captives at his mercy, while the English General was maturing arrangements on so large and complete a scale as to leave no room for any possible mischance to his troops. The former plan, if successful, would have secured the captives from danger and brought the campaign to a conclusion in the shortest possible time and at the smallest possible cost. The latter plan exposed the captives to desperate risk, for their fate was allowed to depend solely on the policy or humanity of Theodore, and it involved enormously disproportionate outlay as regarded the work to be done and great loss of time.

We know now that a rapid advance upon Magdala would in all probability have rescued the prisoners and saved a vast amount of money, but it does not therefore follow that Sir Robert Napier would have been justified in making such a venture and incurring the risk of failure. He was resolved to do all that man could do to ensure success, and in estimating the course pursued by the General it must not be forgotten that he was as conspicuous for his pluck and daring in India as for his caution in Abyssinia. There were many blunders made in the conduct of the expedition, but they were not made by him. The waste of animal life was enormous; the means taken to procure mules and camels were as absurd as they were costly. It was a blunder to allow a divided responsibility in India, and this proved the parent of other blunders when the troops landed at Mulkutto; it was a blunder to employ an engineer officer instead of a contractor in laying down the railroad; there was most unfortunate blundering with regard to pack-saddles, in the choice of muleteers, and in the arrangement of the commissariat, so that Mr Markham observes, "after all the enormous preparations, tea and compressed vegetables were the only rations which came from the base of operations." It is certain that there was also gross financial mismanagement, as we now know to our cost; but in spite of a hundred faults there never was an expedition of which England might be more justly proud. In the language of an able German review it was a triumph of military organisation, and there can be no doubt it has raised the prestige of this country in India as well as on the Continent. The Abyssinians themselves regarded us with wonder, for "this arrival of an army that paid its way appeared almost incredible." They managed also to profit greatly by our visit, and according to the correspondent of the *Morning Herald* found their advantage in dealing with Mr Markham's favourite hero, Colonel Merewether, until Abyssinia became "the dearest place in the habitable globe."

With regard to the purchase of mules, Mr Henry writes:—"General Merewether, by one of those masterly *coups* for which he is so distinguished, has suddenly raised the market price 25 per cent. by giving 50 dollars each for a lot of forty, among which were some very indifferent animals. After this of course 50 will be the current price, until General Merewether makes another purchase for the public service; after which there is no predicting the price at which they will probably arrive." In another place Mr Henry, in deploring some unfortunate mishaps arising from a too lenient policy towards Abyssinian robbers, says:—"Had we had the good fortune to have had a man of decision and energy as our political officer instead of Colonel Merewether, all this would have been avoided."

This divergence of opinion is a specimen of the difficulties which beset the writer even of contemporary history. Here are two gentlemen of education and holding responsible positions, men accustomed to observe and discriminate, and both eye-witnesses of almost all that occurred during the expedition, whose statements are diametrically opposed, one of them thinking that Colonel Merewether was the life of the whole campaign, the other that "too much credit can scarcely be given to Sir Robert Napier." Few we think will agree with the views so frequently expressed or hinted by Mr Markham to the disparagement of the Commander-in-Chief, and it strikes us as an injustice to Sir William Merewether that a comparison such as is here forced upon the reader should ever have been suggested. Truly did Lord Ellenborough declare that the campaign had no parallel in history, and humanly speaking, it is not too much to say that its success was owing to the prescience, the ardour, and the indomitable determination of Lord Napier, of Magdala.

Perhaps the best written and the most interesting portion of the work is the concluding chapter. By a narrative which is alike beautiful and sympathetic, Mr Markham awakens an emotion of something like tenderness towards Theodore, yet never surely was any monarch less worthy of such a feeling. Some pity one must always feel for a fallen enemy; but the horrible cruelties of which Theodore was guilty almost place him outside the pale of humanity. His character indeed was full of contradictions, and the barbarian could be occasionally magnanimous; but his virtues were few, his vices many, and most of the fine qualities the King possessed, or is said to have possessed in early life, were obliterated long before, what Mr Markham terms, his "heroic end." The author compares him not inaptly to Peter the Great, and says—"They were both born Kings of men; both endowed with military genius; both lovers of the mechanical arts; both possessed of dauntless courage; and while capable of noble and generous acts, both very frequently guilty of perpetrating most horrible atrocities." There was nothing left for Theodore at last, writes Mr Markham, "but to die like a hero;" but with our modern notions of courage, we cannot consider his end heroic. Yet it is impossible not to feel shame and regret at the manner in which the dead body of the monarch was treated. This is the story as related in the "history:"—

At this moment Sir Charles Staveley came through the second gate, and a man ran up to him saying that all the prisoners were declaring that a dead body lying near was that of the King. The body was put into a litter and brought to Sir Charles, and the prisoners, first glancing at the face, and then taking up one hand and looking at a finger that had been broken, one and all, exclaimed, "Teôderos!" Sir Charles walked on, and a crowd came round the body, gave three cheers over it as if it had been that of a dead fox, and then began to cut and tear the clothes to pieces until it was nearly naked. The days of chivalry are gone!

It would be unjust to close this volume without awarding a distinct word of praise to the interesting chapter in which Lieutenant Prideaux gives an account of the mission and captivity of Mr Rassam and his companions. It is a simple straightforward narrative, and contains as much in a few pages as the Rev. Mr Stern has managed to relate in half a volume. We may add, although this perhaps is scarcely necessary, that Mr Markham was the geographer of the Abyssinian Expedition, and that his book abounds with interesting observations regarding the country, its people, and its productions. It is one of the most pleasing features in relation to the campaign that so admirable an opportunity for investigating the country was not lost sight of by the Government. Every possible facility was afforded to men of science, and their labours, unlike those of the soldier, may prove of permanent value.
